

Over-the-top video delivery

From creation to consumption

Consumers want their favorite content in more places, on more devices and on their schedule. CenturyLink offers a proven solution. Our end-to-end solutions address all of your needs with a single provider.

Solutions

Linear streaming channels

- **Broadcast video acquisition:** In-network acquisition of hundreds of broadcast channels for OTT-Video and internet TV platforms via CenturyLink® Vyvx® Solutions
- **Rapid scalability:** CenturyLink can rapidly add additional channels as your content offering requirements grow

Video on demand

- **Object storage:** High-speed egress to the CenturyLink CDN via connectivity to the CenturyLink IP network. An object-based storage architecture allows lightning-fast time to first byte
- **Cloud storage connectivity:** Our IP network is directly connected to major cloud storage platforms and we can access your content library for global delivery over our CDN

Full media packaging and preparation services

- DVR, ad insertion, closed captioning pass through, token authentication and remux

Benefits

Scalability: CenturyLink offers a truly global CDN solution that enables you to grow your customer base through the reach and reliability of our high-capacity, high-speed network.

Performance: The CenturyLink® CDN is architected for high-capacity, high-availability and low-latency, resulting in rapid and reliable delivery of content to end users.

Security: Our CDN provides customers' content

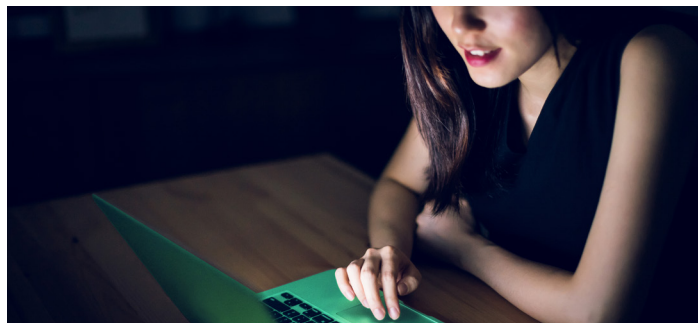

with protection and encrypted delivery over our IP network, which is actively monitoring and mitigating security threats daily, to provide a comprehensive, layered security strategy.

Connectivity: Direct connectivity to the CenturyLink IP network provides to more than 120 Tbps of global serving capacity, connectivity to over 6,000 autonomous systems and over 60 Tbps of peering capacity at 66 unique locations globally.

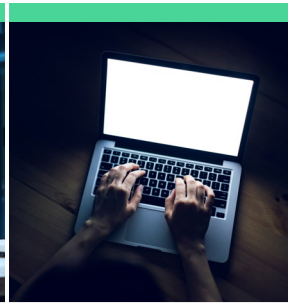

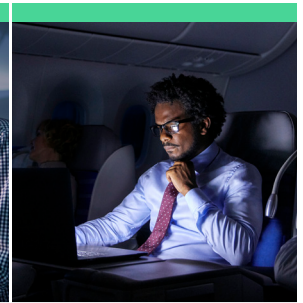

Global delivery: CenturyLink® Content Delivery Network reaches across nearly 120 major metro cities, across six continents.

Why choose CenturyLink® over-the-top video solutions?

The CenturyLink Video Cloud is a proven global provider of video acquisition, distribution, storage and delivery for large and innovative broadcasting and media companies. From over-the-top (OTT) to channel distribution, CenturyLink brings 30+ years of video experience. Our comprehensive portfolio of end-to-end video services and solutions leverages our global network, so your content goes where you want it, when you want it to.
