

CENTURYLINK VYVX UNCOMPRESSED HD SERVICE

THE APEX OF HIGH-QUALITY VIDEO TRANSMISSION

HDTV sets are the standard in homes across the country, and the demand for high-quality HD video is now the norm instead of the exception. Uncompressed HD transmission gives you the tools to meet and exceed these demands for quality video. It also makes it easy to transmit better video by eliminating encoding and decoding, and instead, transmitting your video in its pristine, native format. Built on CenturyLink's award-winning, reliable and scalable Vyvx® Solutions network, the CenturyLink® Vyvx® Uncompressed HD service provides our highest quality long-haul video transmission service for occasional and full time use.

Business Solutions

- Latency: No latency from encoding and decoding, so video transmission will be received at the end destination nearly instantaneously.
- Quality: Video is presented exactly as it comes from the camera with no loss in quality from compression.
- Ease: Removing encoders and decoders from the delivery chain allows you to simplify your operations and eliminates links in the chain where something could go wrong.
- Archival: A location that is receiving an uncompressed HD transmission can store the video in its original form for archival purposes.

CenturyLink® Vyvx® Solutions deliver every event with mission-critical care. With a track record of quality built over 20 years, we've gained a leadership position in domestic and global full-service video transmission solutions. Some of the largest media and entertainment companies worldwide turn to Vyvx for their high-profile news, sports, entertainment and other special event broadcasts.

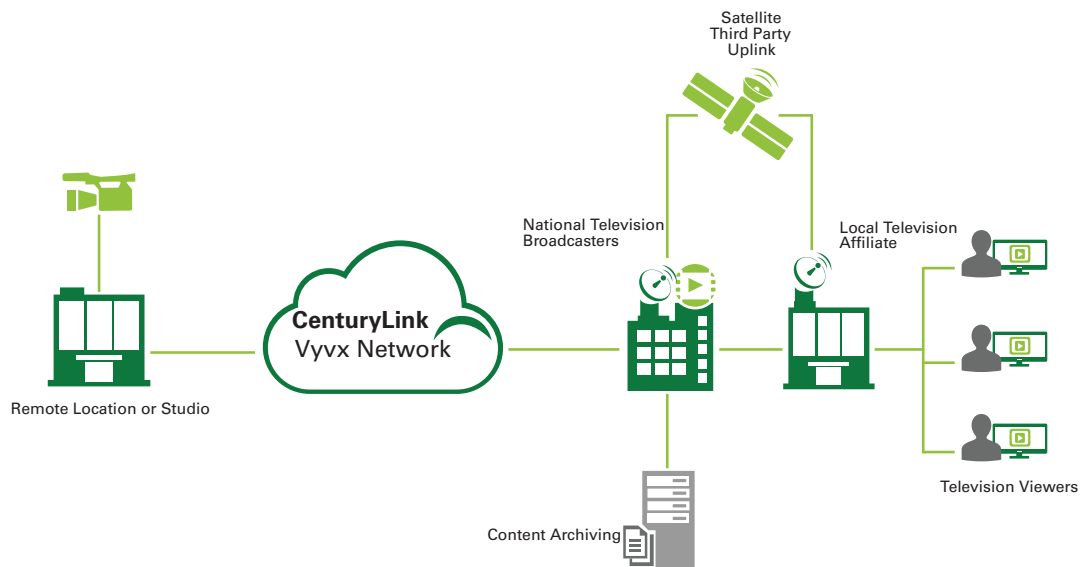

TECHNICAL FEATURES / CAPABILITIES

- Your video is captured and sent from the remote location or studio to your production headquarters via the Vyvx network in its native, pristine format.
- Video can then be processed and/or edited for broadcast and archived for later use.
- Uncompressed HD video supports HD-SDI with embedded audio at 1.5 Gbps and 3.0 Gbps.
- Available for occasional and full time use.
- Bookings available through the customer service center or online through the Vyvx Media Portal

Why Choose CenturyLink for mvns?

- Experience: Our uncompressed service is fully supported and managed by the same experts who have been trusted for more than 20 years to deliver video services.
- Scalability: CenturyLink Vyvx Solutions have the ability to scale, and capacity to handle as many simultaneous feeds as you require.
- Quality: The CenturyLink Vyvx network provides the bandwidth to effortlessly send the highest quality transmissions for pristine video that can amaze you and your audiences.
