

High Performance Computing

FOR FINANCIAL SERVICES

CenturyLink's HPC solutions provide financial services firms with an enterprise-grade platform to cost-effectively and efficiently perform computationally-intensive tasks.

HERE'S HOW IT WORKS:

Pedigree Dedicated to Financial Services

Unparalleled breadth of **compute & storage options**

57 ISO 27001 & Tier III **certified data centers**
2.4M ft² of raised floor

Managed Hosting: Over 30,000 servers
under management, extensive platform capabilities across public and private cloud infrastructure and complemented by extensive experience in deployment and management on all three major operating systems

CenturyLink presently provides **HPC solutions** for a number of **top-tier financial services firms**, with in excess of **150,000 cores** under management in our facilities

More than 26 petabytes of data stored and managed

100% proven data center uptime commitment

HPC Solutions include space, power, rack, servers, cabling capex and opex, HP Integrated Lights-Out (iLO) access, Hosted Area Network (HAN) ports and managed operating system

Multi-layer site security including perimeter fencing and gates, video surveillance, keycards, biometric scanners, man traps and around the clock onsite security staff

More than 50,000 technical employees and over \$3 billion a year in CapEx investments to provide world class data centers, networks and technology tools

A broad range of services with flexible commercials - **flexible contract terms, adaptable service plans and a broad portfolio of IT services** that can be tailored to your environment
