WHY CONVERGENCE IS CRITICAL TO MODERNIZE GOVERNMENT NETWORKS

In July 2016, the Center for Digital Government surveyed 386 state and local government, public safety and education decision-makers to gauge their network convergence – the coexistence of telephone, video and data communication in one IP network. While it’s clear network transformation is a priority, it can be difficult to make it a reality.

CURRENT NETWORKS FAIL TO DELIVER FOR THE PUBLIC SECTOR

ACTIONS NEEDED TO MODERNIZE

BUT THEY FACE CHALLENGES

NETWORK CONVERGENCE PROVIDES A SOLUTION

Network convergence offers a modernization strategy that aligns with key priorities for state and local agencies:

- Stronger protection for data and critical infrastructure
- Opportunities for smarter government decisions
- Better support for mobile workforces
- Enhanced government efficiency and agility
- More responsive digital services

MANY AGENCIES ARE ALREADY IMPLEMENTING NETWORK CONVERGENCE
