

CenturyLink® VoIP Solutions

Advanced Voice Communication

Transition off Legacy Voice Platforms

CenturyLink offers a broad range of VoIP solutions, from fully-managed (Managed Enterprise and Managed Office) to hosted (Hosted VoIP) to premises-based (IQ SIP Trunk), on multiple platforms, including BroadSoft BroadWorks and Cisco Hosted Collaboration Solution. Our expertise can help you transition off legacy voice platforms; our SIP Trunking service is ranked #2 in the U.S. by IHS/Infonetics.

Our VoIP services provide a robust portal for managing your environment and a range of seat types, so you pay only for the features you use, right down to the user. A comprehensive VoIP portfolio works within your budget, integrates existing equipment and architecture, and accommodates vendor preferences. And the Business Communicator app extends voice and video services, file and screen sharing, and IM and Presence to PCs, laptops, tablets, and smartphones.
