

CenturyLink Storage and Backup

Secure and designed to grow with your business

Storage and backup for your business are non-negotiable. Recent trends show that the costs to store and backup your data in-house is growing exponentially due to capital expenses, technology obsolescence, employee training and turnover. Solve these issues and focus on your business by outsourcing your storage and backup needs to CenturyLink™.

“According to Forrester survey data, storage budgets have increased from 10% of the IT hardware budget in 2007 to 17% of the IT hardware budget in 2009.” – Forrester, January 2010, “Controlling Storage Cost Amid High Growth”

CenturyLink storage services (SAN and NAS)	Features	Pricing structure
Tiered, managed storage	Choose from 3 tiers of fully-managed, primary disk storage to meet your performance requirements.	<ul style="list-style-type: none"> • NRC per port, per server • MRC determined by tier and storage commitment • Storage overages charged per GM and TB per month • Storage performance backed by CenturyLink industry-standard SLAs

CenturyLink backup services	Features	Pricing structure
Point-in-time copy	Using SAN, TAN or both, keep copies of your data within the storage array to facilitate rapid recovery in the event of data loss.	<ul style="list-style-type: none"> • MRC charges based on committed usage • Usage over committed overages apply
Off-site archiving	Store your tapes in a secure, off-site facility with a tape archival service. We retrieve your tapes as needed so your data can be copied to your server.	<ul style="list-style-type: none"> • MRC based on per tape charge • Retrieval SLA based on time-to-retrieve, initiation and restoration basis
Managed tape backup	Offload your data to our TAN for long-term storage and retrieval. This service is available with a broad range of options for you to customize.	<ul style="list-style-type: none"> • NRC for installation and per server • MRC per tape and by the committed GB per month • Overages charged by GB

In addition to Storage and Backup, we also offer a full range of Networking, Data, Voice, Security and Professional Services to create a comprehensive suite of telecommunications solutions for your business.

We support these services with:

- Industry-leading service level agreements (SLAs)
- State-of-the-art infrastructure
- Expert technical staff

We use the resources of our Data Centers to deliver a range of Cloud-based services. All our Data Center facilities are connected with OC768 bandwidth to our state-of-the-art, fiber-optic IP network.

Note: Our Storage service is available to customers who purchase our dedicated colocation or managed Hosting Service. A contract is required. In addition to monthly recurring charges, other charges may apply.

“If we wouldn't have found the right partner, I don't think we would have had any choice but to do it [hosting] ourselves... hire the people to manage that environment, build that environment, architect that environment and essentially spend a whole bunch of time doing something that's not necessarily our core competency.”

– Bill Chapin, Seattle Seahawks,
Director of Marketing
