

CenturyLink™ Data Bundle

Network downtime is expensive, costing medium-sized businesses nearly \$1 million annually*

Data Bundle overview

From basic Internet to router management, our Data Bundle can support your current and future demands to keep your business running smoothly. We ensure your networks are running 100% because you can't afford disruptions to your business operations.

Product highlights:

- A high-performance, dedicated solution for Internet or private data networking
- A fully-configured, flexible and compatible solution that works with your internal network
- Bandwidth capacities to meet your needs
- Support 24/7/365 from our award-winning account and service teams

Data Bundle choices

Standard

- Port types – Internet Port, Private Port (multi-protocol label switching (MPLS)) and Enhanced Port (a single port that offers a cloud-based firewall, Internet access and private data networking)
- Multiple bandwidth speeds – to keep performance at optimal levels
- Routers – ADTRAN® or Cisco® rental options
 - Maintenance offered next business day or 24/7/365 on-site, 4-hour response
 - Pre-configured and based on your specifications with personal assistance from CenturyLink
 - Delivered to your location ready for installation and operation

to find the right Data Bundle for your business.

Do you need better data protection or complex data routing?

Pro is the choice for you

For demanding security needs and greater flexibility, the Data Bundle Pro includes advanced routers to support firewall, customized prioritization of applications like quality of service (QoS) and advanced VPN configurations.

Data Bundle Pro includes all the benefits of our Standard Bundle plus:

- Data protection at your premises – firewalls configured to your business needs
- Unlimited IPSec tunnel configurations (up to hardware maximum)
- Customized advanced routing configuration – including QoS/border gateway protocol (BGP), generic routing encapsulation (GRE), open shortest path first (OSPF), available over GRE tunnels with CPE configuration
- Network address translation (NAT)/port address translation (PAT) and Demilitarized Zone (DMZ) security configurations
- Multi-port Ethernet switch and router included with 1.5 and 3Mbps CPE

Need new equipment, but don't have the staff? Let us do it,

Managed is the choice for you

The Managed Data Bundle is the ultimate solution that leaves network management to CenturyLink and includes Network Management Services that proactively monitors and manages your router and reports its activities.

Data Bundle Managed includes all the benefits of the Pro Bundle, plus you can choose from 2 levels of service to support your varying applications and needs:

Select

Ideal for a MPLS network with static routing:

- Proactive monitoring and management – 24/7/365 with proactive notification of faults
- Reporting – customer dashboard for viewing real-time reporting and trouble tickets
- Single point-of-contact for network and devices issues – call one number and we'll manage the issue and let you know when it is resolved
- Performance-based service level agreements (SLAs)

Comprehensive

Ideal for secure Internet or complex routing requirements:

- Data protection – firewall management and configuration
- VPN tunnel – IPSec VPN tunnel management
- Complex routing configurations – support for BGP, EIGRP, OSPF

Data Bundle enhancements

Ideal if you're looking to expand your capabilities (additional costs may apply):

- Hosted Microsoft® Exchange
- Email and Fax Over Email
- Online Backup
- Audio and Web Conferencing
- Anti-Virus and Anti-Spam Protection
