

CenturyLink Colocation services

Reduce expenses, improve data security, centralize IT infrastructure

State-of-the-art protection

Ensure that your mission-critical websites and applications are well protected. CenturyLink™ Data Center facilities are a secure, reliable colocation solution for your needs. All our facilities are 40Gbps IP-backbone integrated and staffed 24/7/365 with trained support and security personnel. You will appreciate the speed of our global network and the performance of our certified equipment and processes.

Data Center highlights:

- Multiple levels of physical security
- 24/7/365 first touch response (FTR) support
- On-site technical staff
- Strong service level agreements (SLAs)
- SAS 70 II-certified and PCI DSS-compliant data centers

Multiple housing options • Advanced, redundant N+1 power systems • OC-768 IP network

Choose your space	Choose your power	Choose your bandwidth

Consider these services for your colocation needs:

- Managed Hosting
- Storage and Backup
- Compute on Demand
- Real-Time Application Recovery™

Our certified engineers and hosting professionals are available for assessments, consultations, architecture planning and troubleshooting.

“We’ve had a really good experience with Qwest [now CenturyLink] hosting and data services. It’s been an excellent vendor partnership.”
– Dave Burch, Enterprise Technical Planning Manager
