

CenturyLink™ International Long Distance

Keep in contact with your customers worldwide

Benefits

- **High call-completion rate and great call quality** with layers of redundancy and network diversity
- **Network separates retail and wholesale traffic** to eliminate contention
- **Fail-safe protocols for call completion** during disaster recovery situations
- **Dedicated service team** proactively monitors and manages quality of service routing
- **Competitive rates** when added to CenturyLink long distance contracts

Reliable worldwide calling

Whether you're adding an office in Budapest or selling products in Brazil, you can trust our International Long Distance to keep you in close, personal touch with customers and suppliers far away. The International Long Distance network is built on industry-leading architecture and is designed to meet the complex needs of commercial customers like you.

International Long Distance is a technologically advanced solution that offers voice access to landline and mobile numbers in more than 200 countries from anywhere in the contiguous U.S. CenturyLink uses least cost routing and answer seizure ratio processes when working with international vendors to dramatically improve the service's quality and pricing structure.
