

### Hosted Microsoft® Exchange 2007 – Increase Productivity, Mobility and Security with the World's Leading Corporate E-mail Platform

More than ever, companies are looking for ways to enable fast, effective and secure online communication between employees and customers. Enterprises want the assurance of a messaging platform that can provide anywhere access to e-mail in a completely secure environment, while providing employees with collaboration tools such as shared calendars, folders and contact lists.

Qwest has combined *Microsoft Exchange 2007* with its powerful offering of core products and services to keep customers connected, enhance security and productivity and help solve critical business problems.

### Choosing the Right E-mail Platform

E-mail is a mission-critical communication tool for businesses, but delivering a feature-rich platform can be challenging. Total Cost of Ownership can be high, due to hardware and software requirements (including backup), licensing and hosting fees and staffing/support expenses. Regulatory requirements are also becoming increasingly complex and merger/divestiture activities require rapid adjustment of service capacity. The “buy versus build” economics are changing.

Hosted *Microsoft Exchange 2007* is an enterprise e-mail platform that includes all of the capabilities of *Microsoft Exchange Server 2007* in one simple package. Your employees will receive rich, efficient access to e-mail, calendars, attachments, contacts and more – no matter where they are or what type of mobile device they are using.

### MICROSOFT EXCHANGE 2007

#### Key Features

- Anywhere access to e-mail through Outlook, Outlook Web Access (OWA) and most mobile devices (ActiveSync and BlackBerry).
- 99.9% uptime guarantee ensures reliable, anytime access.
- Free Outlook license and an unlimited number of e-mail aliases for each mailbox. 300 MB disk space per mailbox.
- Safe and secure e-mail retrieval using RPC over HTTPS, MAPI, POP3 or IMAP.
- Shared calendars, contacts, notes, tasks, folders and documents.
- Hosting in world class data centers to ensure business continuity and disaster recovery.
- Anti-Spam/Virus.
- “Remote device wipe” for lost or stolen mobile devices.
- Archived e-mails.
- Multi-mailbox search.
- Centralized, Web-based access for all your configuration and administration needs.

## How it Works – Simplified IT Management

Hosted *Microsoft Exchange 2007* is housed in our state-of-the-art data centers, which provide the reliable and redundant infrastructure needed to support the service.

Qwest adds further value by handling setup, provisioning, ongoing maintenance and upgrades of your Exchange Server Infrastructure, reducing workload on your IT resources and enabling them to focus on core strategic initiatives that move your business forward.

Your IT resources will also receive access to SiteControl, a Web-based account management portal that provides the tools needed to manage e-mail domains and accounts, maintain Web sites and track usage at any time and from any location with access to an Internet connection and browser.

## HOSTED MICROSOFT EXCHANGE – BENEFITS FOR YOUR BUSINESS

### Lower Total Cost of Ownership

Allows you to use Qwest's hardware, infrastructure and personnel rather than deploying and maintaining your own on-premises solution.

### Power of Collaboration

Enhance productivity by sharing calendars, contacts and tasks. Eliminate version control concerns by using shared folders, file and business notes.

### Security

Message encryption ensures data is only accessible to those with a need to know. "Remote device wipe" protects users in the event of mobile device loss or theft.

### Maximize IT Resources

Use Qwest's resources and free your IT professionals to work on more strategic company initiatives.

## Connect, Simplify and Enhance Your Messaging Solution

Your time is valuable. Your data is precious. Qwest wants to help you connect, simplify and enhance your messaging solution with *Microsoft Exchange*. For more information on this and other Qwest solutions, contact your Qwest Sales Representative or go to [www.qwest.com](http://www.qwest.com).
