

3.4 GEOGRAPHIC COVERAGE

Qwest's complete and detailed description of geographic coverage is provided in Appendix 1, Geographic Coverage Description, in the format of Section J.2 as required by L.34.5.3. Qwest is fully compliant with the Networx requirements for domestic and non-domestic service. Qwest is pleased to provide voice services to over [REDACTED] countries and data services to over [REDACTED] countries.

J.2 GEOGRAPHIC COVERAGE

Stipulated requirement – no response required.

J.2.1 DOMESTIC SERVICE COVERAGE

Stipulated requirement – no response required.

J.2.2 Non-Domestic Service Coverage

Stipulated requirement – no response required.

J.2.3 ACCESS ARRANGEMENT COVERAGE

J.2.3.1 DOMESTIC ACCESS ARRANGEMENT COVERAGE

Stipulated requirement – no response required.

J.2.3.1.1 Wireline Access Arrangement Coverage

Qwest provides wireline access coverage and prices for the following SWCs:

- (a) Those which serve one or more Network Site Codes as contained in the traffic model
- (b) Those SWCs that are listed in the Networx Hosting Center as the mandatory Universal SWCs
- (c) Those where access is available commercially from Qwest
- (d) Those which serve additional Network Site Codes beyond those contained in the Traffic Model, as requested by the Government, dedicated wireline access provided at each SWC in the RFP that serves

one or more Network Site Codes or are in the mandatory Universal SWC list will include all access arrangements needed to efficiently serve the Network Site Codes plus the following dedicated access arrangements:

- (a) Analog (4 kHz bandwidth)
- (b) Sub-rate DS0 (4.8/9.6/19.2 kbps)
- (c) DS0 (56/64 kbps)
- (d) T1
- (e) ISDN PRI
- (f) Fractional T1 (2/4/6/8/12 DS0)

J.2.3.1.2 Dedicated Broadband, Wireless and Satellite (BWS) Access Arrangements

Stipulated requirement – no response required.

J.2.3.2 Non-Domestic Access Arrangement Coverage

Stipulated requirement – no response required.

J.2.3.2.1 Wireline Access Arrangement

For dedicated access types and for switched access types, Qwest access is provided for the Network Site Codes in the Traffic Model, plus where available commercially from Qwest for locations in countries/jurisdictions that Qwest serves on an end-to-end basis. Where dedicated access is provided by a foreign carrier, Qwest will:

- (a) provide pricing on a pass through basis of actual costs without markup from the foreign carrier, or
- (b) provide fixed prices in U.S. currency.

J.2.3.2.2 Dedicated Broadband, Wireless and Satellite Access Arrangements

Qwest will provide access arrangements non-domestically where it provides such coverage commercially.

J.2.3.3 Special Service Coverage
