Limited Rights Notice (June 1987)

(a) These data are submitted with limited rights under Government Contract No. GS00T07NSD0040. These data may be reproduced and used by the Government with the express limitation that they will not, without written permission of the Contractor, be used for purposes of manufacture nor disclosed outside the Government; except that the Government may disclose these data outside the Government for the following purposes, if any; provided that the Government makes such disclosure subject to prohibition against further use and disclosure: (i) Use (except for manufacture) by support service Contractors on the FTS Program, including but not limited to non-government evaluators, management, and operations support Contractors. (e.g., Network Universal and Network Enterprise). This excludes other FTS comprehensive and non-comprehensive service Contractors.

(b) This Notice shall be marked on any reproduction of these data, in whole or in part.

¹ The categories and number of assessment objects included in the assessment should be a function of the FIPS 199 and NIST Special Publication 800-53 impact level of the information system. Organizations should consider increasing the categories and number of objects assessed as the impact level of the information system increases. The increased coverage and depth of the assessment as well as the type of testing employed during the assessment, contributes to greater assurance in the overall effectiveness of the security control being assessed.
