

# CenturyLink Managed Firewall Service

## Networkx Service Overview

CenturyLink's Managed Firewall Service (MFS) safeguards internal networks and systems from unauthorized access and hostile activity, protecting your Agency's critical data from compromise and tampering. It is the first line of defense between your Agency's trusted internal networking environments, Demilitarized Zones (DMZs), and external and public networks. CenturyLink's MFS inspects traffic according to your Agency's set of defined security policies, blocking all traffic not meeting your Agency's criteria.

### Features

CenturyLink's MFS provides an extensive list of features, including but not limited to the following:

- Perimeter protection designed to mitigate unauthorized access
- Perimeter protection designed to limit unauthorized outbound traffic
- Real-time activity log analysis
- Robust Security Information Management (SIM) System for correlating and detecting security threats
- Combined suite of technology, processes and trained security engineering team necessary to implement, monitor and manage your Agency's defined firewall security policies from a 24x7x365 Security Operations Center (SOC)

### Benefits

- Backed by a CenturyLink team of certified data-security professionals
- FISMA (Federal Information Security Management Act) compliant
- Rapid response to information security changes through firewall rule sets and system configuration changes
- Activation and management of secure remote access (when incorporated in the firewall)
- Backed by a CenturyLink team of certified, data security professionals
- Early warning threat mitigation combined with real-time network statistics alerting
- SIM Agent enables correlation of multiple security devices and a near real-time dashboard with drill down capability for improved security monitoring

### How it works

CenturyLink's Managed Security Services Team (QMSST) translates the policies and objectives defined by your Agency into rules and configuration parameters that are entered into your Agency's firewalls. CenturyLink's SOC receives and analyzes the log files pertaining to firewall activity, and monitors any alarm conditions. In the event of an information security event, the CenturyLink SOC will respond with timely implementation of the reactive measures authorized by the Agency.

### Why Buy from CenturyLink?

- CenturyLink provides a comprehensive Managed Firewall Service that is vendor and device independent. This allows your Agency to retain its current infrastructure and permits simpler future technology refresh
- CenturyLink's MFS provides monitoring and management of your Agency's firewalls, freeing your Agency's limited resources to pursue more critical Agency missions
- CenturyLink offers a broad range of expertise in defense modernization efforts, intelligence, homeland security, logistics and product support, health and life sciences, space and earth sciences and global commercial services
