Welcome to CenturyLink Cloud Services

Big business tools for small business needs.

Your CenturyLink High-Speed Internet service includes a complete suite of cloud-based business tools. You’ll have anytime, anywhere access to your work files, applications that are always updated to the most recent versions, plus all the web, backup and security tools that every business expects today.

CLOUD SERVICES INCLUDE:

- Microsoft Office 365 Business Essential, with two users standard
- Includes email, online Office applications and more
- Additional users and upgrade options available
- Domain name registration
- Website tools and hosting
- Online data backup
- Cloud Fax

This guide is a basic outline designed to help you get your cloud services up and running quickly — whether you choose to take advantage of your FREE Application Activation session (recommended) or would like to explore on your own. And, if you have any questions along the way, we’re always here to help, online or on the phone, 24 hours a day, seven days a week!

See page 12 for customer service information.

The best way to get started is with a FREE one-hour Application Activation session with our Technology Support Team. Schedule your appointment at centurylink.com/activate or call for help at any time.
Getting Started

Learn how to set up and use your Business Applications

Schedule your FREE Activation Appointment

During this complimentary one-hour consultation, a member of our Technology Support Team will guide you through the activation process. Whether you’re tech-savvy or not, this session is the easiest way to get everything set up properly for the unique needs of your business.

If you were not scheduled for an Activation Appointment when you placed your order, we recommend you do so now.

• Please visit centurylink.com/activate to schedule your appointment online.
• Set aside one hour for the appointment, at a time when you can be both on the phone and online at your computer. You and the consultant will walk through each step together, right on your computer screen.

Activation Checklist

What to prepare before you start

Whether you choose the guided activation, or prefer to handle it on your own, there are a few things you should have prepared ahead of time:

☐ Decide who will be the primary Administrator of your account. Administrator functions are indicated with this icon ✪.

☐ Consider what users and email addresses you need.

☐ Have a domain name in mind for your business, either one you already own or the one you’d like to have (e.g. yourbiz.com). You may also need the login credentials for your current domain registrar (such as GoDaddy), if any.

☐ Determine which computers and/or devices you would like to set for backup.

☐ Coordinate with your company’s IT department, if any, to ensure systems access.

☐ You will need a CenturyLink ID, which is the same user name and password you use to access your CenturyLink account online. If you don’t already have a CenturyLink ID, choose the Get Help button on the first CenturyLink login screen. You’ll be redirected to a page where you can Create New Account. It’s a good idea to have your CenturyLink bill or order confirmation handy when you create your account.

☐ You’ll also need the Office 365 Administrative ID you should receive in a separate welcome email from CenturyLink. If you do not receive the email, call 1-855-459-6121.

To set up your Business Applications on your own

Follow the self-activation instructions on the following pages. Save this document to your computer for reference, or print out these pages for a hands-on guide.
Log in via the CenturyLink Portal

Go to centurylink.com/apps/login
- You’ll always access your features using this same URL, so you may want to bookmark this page.
- Click the [LOGIN] button and enter your CenturyLink ID.

Enter the same CenturyLink ID and password that you use to access your CenturyLink account, if you have one already.

If you are a new user, click the Get Help button. You’ll be taken to a screen where you can Create New Account. It’s a good idea to have your bill or order confirmation handy when you’re creating your account.

You may also use the Get Help button if you can’t remember your CenturyLink ID and password.

Get acquainted with your Management Console
After you log in, you will be at your Management Console. Let’s take a look at the sections:
- The DASHBOARD tab shows account information on the left side, and a list of your subscribed services on the right. Click Manage to access that service.
- The APPLICATIONS tab shows a complete list of your services and their status. The Status may say Ready to Activate, Provisioning, or Active depending on what stage of setup you’ve completed.
- Choose any individual tab, such as Web Hosting, to access that particular service.
- Under MyCloud in the upper right corner, pull down for convenient links to your Dashboard and Account.

Although most features can be found in several places, the instructions for certain services may recommend that you access them through a particular screen.

Click the Live Chat button for immediate assistance at any time.
Activate Entitlements

First, you have to ACTIVATE the services you plan to use before you can set up and use them.

- Log in to your Management Console: [centurylink.com/apps/login](http://centurylink.com/apps/login)
  as described on the previous page.
- You will be presented with the Entitlements screen, which lists all the services included in your package.

**Activate A New or Existing Domain Name**

Before you can set up any of your business applications, you need to determine the domain name you want to use. You may register a new name if you don’t have one yet, transfer an existing name to your CenturyLink account, or continue to use a name you already own. Locate the Add Your Domain section, then:

- **To register a new name**, click the Register New button, then enter your desired Domain Name in the box on the right. Click [ACTIVATE DOMAIN]. You’ll be taken to a screen where you can “purchase” the domain name included in your package for $0.00. Follow the instructions, then return to your Entitlements list.
- **To transfer an existing name**, click the Transfer button, then [ACTIVATE DOMAIN]. Follow the instructions given on the next screen. You will need to contact your current registrar for an authorization code to complete the transfer.
- **To keep an existing name with your current provider**, it should already be listed on your account. If it is not shown in any of the “Select a Domain” fields, go to the Web Hosting tab, Configure & Buy page. Click the Use Existing button, and enter your current domain name. This tells CenturyLink to make that domain name available for your email, website and other included services.

**Activate other Entitlements**

After you choose your Domain Name, return to the Entitlements tab.

- If you’re ready to activate more of your Entitlements, select any of the others you want to use EXCEPT for Microsoft Office 365, and click [ACTIVATE]. Make sure you receive a confirmation for each. You can always return at another time and activate more if you’re not sure which ones you’re going to use right now.
- Some of the Entitlements, such as Web Hosting, will have a dropdown menu where you can select which domain you intend to use for that service. The dropdown should already list the domain name(s) you registered in the steps above.

- If you activate all the Entitlements, you’ll see the message: “You have no Entitlements that require activation.”
- Follow the special instructions to activate Office 365 on the following page.
Microsoft® Office 365 Admin

Activating Office 365 requires a different activation procedure from the other Entitlements.

- Log in to your Management Console: [centurylink.com/apps/login](http://centurylink.com/apps/login)

▶ Activate Office 365

- From the Entitlements screen, select the Microsoft Office 365 line item. Choose your domain name from the pulldown menu, or enter a new one now. Click [ACTIVATE].
- You will be redirected to the Office 365 login page to establish a master Admin password.
- Enter the Office Administrative ID you received in your Office 365 welcome email (NOT your CenturyLink ID). Click the Can’t Access Your Account link, enter your desired password, then click NEXT to return to the Office 365 login screen and continue.

Your package includes Microsoft Office 365 Business Essential.

Make a note of your new password. You will need it each time you log in to Office 365.

Office 365 Business Essential includes 2 users. Additional users are available for a small fee per user.

If you’re switching existing email addresses over to Office 365, make sure they are typed out exactly the same when you Add Users.

IMPORTANT: All existing users need to be set up in Office 365 BEFORE you update your DNS records, or their email could disappear.

Set up Office 365 Users

Once you get logged in, you’ll be at the Office 365 Admin Center. Click SETUP in the left sidebar and follow the Basic Setup wizard. You will be guided to:

- Verify your Domain
  Tell Office 365 what domain you’ll be using for your email. Take your time and follow the instructions carefully. Be sure to wait for confirmation at each step. Call for assistance if you need help.

- Add Users and Assign Licenses
  Add Users one at a time, establishing each email address (jgarcia@yourbiz.com) you need for your staff. A password will be automatically generated for each person, or you can type in your own. Keep in mind that the same user will be enabled on every Office 365 feature, so make sure to assign your users wisely. You will receive an email to confirm that each user has been set up. Make sure to provide them with their passwords.

- Update DNS Records to switch your email from your current provider to flow through CenturyLink / Office 365. Once you complete this step, your email will no longer go to your previous provider. All of your email will start to appear in Office 365 / Outlook instead. See page 8.

Now you are ready to start using the Office 365 features.
Now that your Office 365 users are set up, each individual can access their own services.

- **Log in to the CenturyLink Management Console:** [centurylink.com/apps/login](http://centurylink.com/apps/login) with your CenturyLink user name and password. From the APPLICATIONS tab, choose Office 365 and Manage.
- **Log in to Office 365 directly at:** [portal.office.com](http://portal.office.com) with your Office 365 email / user name and password.

**Office Applications**

Online versions of the Office application suite are included. Every time you’re online, your files are being continuously saved, and software updates happen automatically. You no longer have to worry about buying the most current version of Office.

**OFFICE ONLINE SOFTWARE**

- To use Online versions, click on the **Application Launcher** grid in the upper left corner. Choose the application you’d like to use, and start working. See page 8 for more information.

**DESKTOP SOFTWARE**

- Go to your **Office 365 Admin Center** page. If you aren’t automatically presented with the Install screen shown below, go to the Settings icon upper right, and pull down to Office 365 Settings. Choose Software.
- Choose your language, then click [INSTALL NOW] and run the installer.
- This will install **Office, PowerPoint, Excel, OneNote** and **Outlook** onto your computer. If you’re using a Mac, follow the instructions to get the Mac versions instead.

**OFFICE MOBILE**

- Go to Google Play or the App Store and locate the **Office Mobile** application.
- Install the App on your mobile phone or tablet.
- Open the Office App and sign in with your user name and password. Enjoy anywhere, anytime access to your synchronized Word, Excel and PowerPoint documents.
Using Microsoft® Office 365

If you are not already at the Office 365 Admin Center:

- Log in to the CenturyLink Management Console: centurylink.com/apps/login
  with your CenturyLink user name and password. From the APPLICATIONS tab, choose Office 365 and Manage.
  or
- Log in to Office 365 directly at: portal.office.com
  with your Office 365 email / user name and password.

Outlook Setup • Email • Contacts • Calendar

- Open the Outlook application, either from the launcher  or on your computer.
- The first time you open Outlook, you’ll be prompted through an Auto Account Setup. Enter your own user name and password, then click NEXT. It may take a few moments for your account to be provisioned.
- Reopen Outlook and you will see a familiar email interface. Check your Inbox and send mail as always.
- From the launcher , choose People to build or import your contact list. You’ll also find an integrated Calendar and Tasks in the launcher.
- Modify your profile and account settings in Options under the Settings icon .

Microsoft Office • Excel • PowerPoint • OneNote Online

- Open your online Office applications from the launcher  .
- Each application looks just like the desktop software you’re used to, with familiar tools and commands. As you create new documents, they are continuously saved to OneDrive storage (see next page).
- You can always choose Save As to save a copy of your document to your hard drive.
- Access any of your documents anytime you have access to a Web browser, or via the Office Mobile App.

HINT: Click on the avatar (person icon) in the upper right corner and add your own photo so you and your colleagues can easily recognize each other. You can also choose your visibility to show others if you’re Available for messaging or meetings whenever you’re in any of the Office 365 online applications.

Create Notebooks in OneNote to store ideas, text, pictures and more.
With Web and video conferencing, desktop sharing, and instant messaging, Skype for Business gives you the most up-to-date tools to work as a team, all within a secure, private and compliant space.

Watch more about Skype for Business centurylink.com/apps/support/knowledge-base/skype-new-users-guide

**Skype for Business**

- Before you can use Skype, you will need to install the application. From the Office 365 Admin Center page, go to the Settings icon on the upper right, and pull down to Office 365 Settings. Choose Software. Follow the instructions to install Skype.
- Now you can open the Skype application. Enter your email address and password, then choose a status from the pulldown menu: Available, Busy, Do No Disturb, Be Right Back, or Away. Click SIGN IN.
- Start by building your Contact List. You may build your list manually or import a contacts list. You’ll only be able to use Skype with others who also have Skype accounts.
- To initiate a session, double-click on the Contact(s) you want to collaborate with. Choose Instant Messaging (IM), place a Call from your computer, conduct a Video Conference, Share Files, and more.

**SharePoint**

- From the launcher, choose SITES to open the SharePoint environment.
- Choose +new to create and name a new site for your Project or Department. You can even customize each site with a different brand and description for easy recognition.
- Continue to build your project by inviting contacts, establishing deadlines and tasks, and including corresponding documents and email from Outlook.
- Install the Yammer app to create a custom social network within your SharePoint workspace.

**OneDrive**

- From the launcher, open OneDrive.
- The first time, you may be asked to download the software. Follow the instructions given.
- Get in the habit of using the Sync button. This will ensure that any of the documents you create online are automatically updated with the documents you have on your computer.
- Files that have been synced will display a green checkmark beside the file name.

Using Microsoft® Office 365

- Log in to the CenturyLink Management Console: centurylink.com/apps/login with your CenturyLink user name and password. From the APPLICATIONS tab, choose Office 365 and Manage. or
- Log in to Office 365 directly at: portal.office.com with your Office 365 email / user name and password.

*SharePoint is used to create private project-specific “sites” where your teams can interact.

*OneDrive is where all the documents you create are stored. You can also create new documents from inside OneDrive and may find it convenient to do most of your work from this workspace.
Online Backup

- If you’re not already logged in, go to centurylink.com/apps/login
  For more detailed instructions, go to centurylink.com/apps/knowledge-base

Secure Online Backup
Secure all of your important files with external backup and cloud-based storage. Automatic backup provides peace of mind anytime, anywhere.

- From the CenturyLink Management Console, click the APPLICATIONS tab, locate PC Backup and click Activate, then Setup under the Action column.
- Fill out the Account Information and SAVE.
- You’ll see the Status change to Provisioning. Wait about 5 minutes, then return to the Applications tab or refresh your page. The Status should now say Active.
- Click Manage and you’ll see how many users you have available.
- Click NEW USER and set up the Name, Email and Password for the person who will use this account. That person will receive an email with installation instructions.

INDIVIDUAL USERS

- From the email, launch the Installer to install the Backup software onto the PC or laptop you want to have backed up.*
- During the installation, you will be required to create a Private Key and Account Key that you will need if you ever have to recover your data. Keep this information in a safe place! It cannot be recovered if you lose it. Click YES at the encryption screen.
- Secure Online Backup will now install and automatically initiate a full file backup.
- To configure your Backup schedule, manually run a Backup or Restore files on your computer, go to Start > Programs > savvisdirect DS-Consumer Client > OneClick DS User. Log in with your own User Name and Password to get to the control screen. Click a function and follow the instructions provided.

If you’re not already logged in, go to [centurylink.com/apps/login](http://centurylink.com/apps/login)

### Web Hosting

Several services are included under the Web Hosting section, accessed either via the Web Hosting tab, or listed under Subscribed Services in the Dashboard.

#### WEB SITE

- To access the SiteBuilder tool,* click the WEB HOSTING tab. On the line with your domain name, click Manage, then Manage again to the right of SiteBuilder in the services list.
- Select your website topic and choose your language, then click CREATE SITE.
- Prefill your website with your contact information. This is what will be used on your Contact page.
- Now you’ll be at the SiteBuilder Toolbar where you can choose a design template, start filling in your content, add features such as a blog, online store, social media links and more.

#### SEO TOOLS

- On the WEB HOSTING tab, locate your domain name and click Manage, then Manage again after Applications.
- At the Webhosting Control Panel, click on the Applications icon in the left column.
- Locate Attracta SEO and click INSTALL. Fill out the account information and click INSTALL.
- Back at the Webhosting Control Panel, you should now see Attracta under the Quick Launch Apps. Hover over the icon and choose Control Panel where you can start building your site traffic by submitting your site to major search engines, building links, and more.

### Cloud Fax

- From the Management Console, click the APPLICATIONS tab, locate Cloud Fax and click Manage, then Setup under the Action column.
- Fill out the user ID and password information. The Login/User ID must be an email address. Click SAVE.
- You’ll see the Status change to Provisioning. Wait about 5 minutes, then return to the Applications tab or refresh your page. The Status should now say Active.
- Click Launch Service.
- To SEND a fax, click the Send Fax icon, then enter the recipient’s fax number manually, or you can add from your contacts list. Browse and attach the file(s) you would like to send, and choose whether you want to include a cover page with a message. Click [SEND] when you’re ready.
- To RECEIVE a fax, you will need to provide your senders with the Cloud Fax telephone number you will be assigned during setup. Anyone can then use their fax machine to send a fax to you, and you will receive the fax in your email.
- Cloud Fax includes an Inbox and Outbox so you can keep a record of all your outgoing and incoming faxes.

* SiteBuilder subject to browser compatibility.
 Bookmark the business applications portal at centurylink.com/apps/login along with the others you will use most often.
