

Call Forwarding

When you are going to be out, Call Forwarding automatically forwards all your calls to a selected local, long-distance or wireless number.* You can still make outgoing calls while Call Forwarding is in effect.

To activate

After you hear a second dial tone, dial the number you want your calls forwarded to. Wait for someone to answer, then hang up.

To cancel

How to set up Call Forwarding

- Lift the receiver and press ***72**.
- When you hear a second dial tone, dial the number you want your calls forwarded to.
- When that phone is answered, Call Forwarding is activated and you can hang up.
- If the phone is busy, or no one answers the number you want your calls forwarded to, hang up and repeat steps 1 and 2. Two quick tones will confirm that Call Forwarding is in effect.
- As a reminder, you'll hear a short ring on your phone each time a call is forwarded.

How to cancel Call Forwarding

- Press ***73**. Two tones tell you Call Forwarding is off.

* Measured service and long-distance charges may apply for all completed calls.
