Option #13 (Obsoleted 05/01/09, Type D)
1+, 0+

100. OBSOLETE SERVICE OFFERINGS

100.2 CUSTOM CALLING SERVICES

100.2.1 SINGLE FEATURES

(Obsoleted October 21, 2008)

(Not offered for new installations on and after the obsoleted date.)

A. Call Waiting

Provides a customer, busy on a call, with a tone signal when another caller is trying to reach that number. The customer may then hold the first call, answer the second, and talk alternately on each call.

B. Call Forward Fixed (FCF1FLC FIX)

Provides a customer the capability to control activation/deactivation of the service by using dialing tones. The customer selected forward-to number is preprogrammed by the Company at the time service is established and can only be changed via service order.

C. Speed Dial 30

Provides for the calling of a local or long distance telephone number by dialing an abbreviated code. Speed Dial 30 provides capacity for up to 30 programmed numbers.

D. Hot Line

Provides automatic routing of all calls to a predetermined number as soon as the telephone instrument is taken off hook. The predetermined number is assigned in the Central Office by the Company and cannot be invoked or revoked by the customer. The predetermined number may not be forwarded to a telephone operator or Company official number. The non-dial instrument used for Hot Line service cannot be used for normal telephone service.

E. Warm Line

Allows automatic routing of calls to a predetermined telephone number when the station is off-hook for a specified time period. The predetermined number is assigned in the central office by the Company and cannot be invoked or revoked by the customer. The predetermined number may not be forwarded to an operator or Company official number. The Warm Line delay feature allows use of a standard telephone instrument and normal telephone service.

F. Call Waiting Options

In addition to providing Call Waiting ID [Section 6.2.1(l) of the Guidebook], the Call Waiting Options feature provides a variety of options for handling a second call without interrupting the current call. Options for handling a second call during an active call include answering the call, sending a "please hold" message, conferencing the caller with the current call, or forwarding the caller to voice mail.

100. OBSOLETE SERVICE OFFERINGS

100.3 EXPRESSTOUCH SERVICE

100.3.1 EXPRESSTOUCH FEATURES

(Obsoleted October 21, 2008)
(Not offered for new installations on and after the obsoleted date.)

A. Caller ID - Number Only

Caller ID - Number Only enables the display of the incoming calling telephone number on the Customer Premises Equipment (CPE) display device attached to the customer's telephone line. (NOTE: CPE must comply with FCC Part 68 Rules and Regulations). The number is delivered for continuous display during the silent period between the first and second ringing cycles. A telephone with display capability is required to receive and display the calling number information. The calling party must be part of the ExpressTouch network to have the number displayed. If the calling number is not part of the ExpressTouch network the CPE will display an "out of area" message.

The calling number for a call that has been call forwarded will be displayed on the forwarded station if it has the Caller ID - Number Only feature.

The Company will deliver all telephone numbers, subject to technical limitations, including telephone numbers associated with Non-published Telephone Number Service unless the non-published telephone number service customer subscribes to and/or has activated a Caller ID Per Call Blocking option described in other sections of this Guidebook. Numbers from non-ExpressTouch offices cannot be delivered.

Due to blocking, the Caller ID - Number Only feature is not suitable for the provision of 911 or E911 service and is, therefore, not available to 911 or E911 providers except in conjunction with their administrative lines.

B. Anonymous Call Rejection (ACR)

Anonymous Call Rejection (ACR) is an arrangement provided to Caller ID - Number Only and to Caller ID with Name customers that allows customers to reject receipt of calls where number or name delivery has been blocked. The calling party who has chosen to block number or name delivery will hear a recorded announcement stating that the called party will not accept blocked calls. This feature may be activated or deactivated at the discretion of the Caller ID - Number Only or Caller ID with Name customer by dialing a code. Anonymous Call Rejection is included with the Caller ID - Number Only and Caller ID with Name features and is available as a stand-alone feature. ACR will be provided based on the availability of facilities.

100. OBSOLETE SERVICE OFFERINGS

100.4 FOREIGN EXCHANGE SERVICE (Residence Only)

(Obsoleted October 21, 2008)

(Not offered for new installations on and after the obsoleted date.)

Foreign Exchange Service will be continued for all residence customers subscribed to the service as of October 21, 2008. Existing lines will be continued for the same customer at the same location or until the customer discontinues the service.
