Summary of Notes for CenturyLink Regional Performance Results Report
September 22,2021

General Comments:

· This Summary of Notes is based on the current PID in effect in each state in accordance with state-by-state implementation.

    Detailed information on which PID (Exhibit B) version is in effect can be viewed on line at

    http://www.centurylink.com/wholesale/clecs/nta.html

· Instances where no CLEC and/or CenturyLink results are reported for a particular month, and instances where no measurement is reported,

    are due to no CLEC activity.

· New Service Quality (OP-5) and Repair Repeat Report Rate (MR-7) are reported one month in arrears.

    When a documented code change includes one of these PIDs, the impacted month is one month behind. As an example, if the

    change applied to OP-3, OP-4, and OP-5 as was completed in the June 2017 release, June would be reported in the implementation

    column. This would indicate that the change applied to June results going forward for OP-3 and OP-4, but since OP-5 is reported

    one month in arrears, the change applied to the May results reflected on the June report and going forward.

· When a change requires a rerun of historical data the effective date column will record the start month for the rerun.

· Summary of Notes is published on an as needed basis when reportable changes to the reports are made.

PID Numbers	Products (if applicable)	Description of Note/Comment	Implementation Month	Effective Month
All	All	Eliminate South Dakota 271 PID/PAP reporting per Commission approval.	Dec-20	Dec-20
MR-8	Unbundled Loop Analog, Unbundled Loop ADSL, Unbundled Loop XDSLi	The product categories of Unbundled Loop Analog, Unbundled Loop ADSL and Unbundled Loop XDSLi under the MR-8 metric had not been included in the PID output reports. No PAP processing or parity reporting was impacted, and all data was intact. As of the Effective Month, all volume and results are reflected with the 13 rolling month history of the PID reports.	Jan-21	Mar-20
GA-1	All	The GA-1 gateway metrics data source was moved from IMA to EASE in coordination with the system conversion preciously notified via CMP.	Mar-21	Feb-21
PO-1	All	The PO-1 metrics data source was moved from IMA to EASE in coordination with the system conversion preciously notified via CMP.	Mar-21	Feb-21
Multiple	Multiple	Implement multiple PID/PAP changes to remain compliant with FCC Order 19-72 UNE Forbearance WC Docket No. 18-141 dated August 2, 2019 . Changes to individual metrics are documented in Exhibit B and K, approved by multiple states with varying timeframes.	May-21	Varying
BI-2	All	Implemented continous data improvement on the BI-2 metric by eliminating Retail from the combined values in this metric.	Apr-21	Apr-21
All	All	Eliminate Iowa 271 PID/PAP reporting per Commission approval.	Aug-21	Aug-21
