

**Summary of Notes for CenturyLink Regional Performance Results Report**

December 7, 2022

<p><b>General Comments:</b></p> <ul style="list-style-type: none"> <li>• This Summary of Notes is based on the current PID in effect in each state in accordance with state-by-state implementation. Detailed information on which PID (Exhibit B) version is in effect can be viewed on line at <a href="http://www.centurylink.com/wholesale/clecs/nta.html">http://www.centurylink.com/wholesale/clecs/nta.html</a></li> <li>• Instances where no CLEC and/or CenturyLink results are reported for a particular month, and instances where no measurement is reported, are due to no CLEC activity.</li> <li>• New Service Quality (OP-5) and Repair Repeat Report Rate (MR-7) are reported one month in arrears. When a documented code change includes one of these PIDs, the impacted month is one month behind. As an example, if the change applied to OP-3, OP-4, and OP-5 as was completed in the June 2020 release, June would be reported in the implementation column. This would indicate that the change applied to June results going forward for OP-3 and OP-4, but since OP-5 is reported one month in arrears, the change applied to the May results reflected on the June report and going forward.</li> <li>• When a change requires a rerun of historical data the effective date column will record the start month for the rerun.</li> <li>• Summary of Notes is published on an as needed basis when reportable changes to the reports are made.</li> </ul>
--

PID Numbers	Products (if applicable)	Description of Note/Comment	Implementation Month	Effective Month
All	All	Eliminate Wyoming 271 PID/PAP reporting per Commission approval.	Jan-22	Jan-22
All	All	Eliminate Montana 271 PID/PAP reporting per Commission approval.	Apr-22	Apr-22
