

CENTURYLINK® HIGH SPEED IP SERVICE

SETTING THE STANDARD FOR THE CUSTOMER EXPERIENCE

We understand the internet experience you provide your customers is vital—and it's only as good as the underlying network's quality. That's why we built the CenturyLink® High Speed IP (HSIP) network to be fast, reliable and ready to scale with your business growth. Our HSIP service provides access to a global IP backbone across North America, Latin America, Europe and Asia. This service includes sophisticated network security, a comprehensive range of port interface speeds, online performance reports and service management capabilities. By combining our ability to scale, our extensive network reach and the reliability of our resilient network, our customers receive a quality IP service with proven performance.

Business Solutions

Grow With CenturyLink: CenturyLink operates a global IP network. With more than 21 Tbps of global peering capacity and reach to 60 countries worldwide, our multi-conduit network is built to be continuously upgradable. And it's engineered for resiliency to give you the reliability you require.

A Better, More Secure Internet: CenturyLink sets a new standard for maintaining a clean, safe network with network-level protection and a full, comprehensive CenturyLink Managed Security solution to help protect our end users.

Achieve Greater Operational Efficiency: Operate your business the way you want with flexible access, bandwidth and billing options. Our award-winning MyLevel3SM portal offers online support. Our 24/7 support center is also available. And our services are backed with service level agreements and fast service activation intervals.

Deliver a Superior Customer Experience: Our High Speed IP service delivers bandwidth-intensive content such as video, gaming, e-commerce, music and voice applications. As a vastly connected internet service provider (ISP), you can reach more destinations faster with fewer hops utilizing the CenturyLink network.

CenturyLink® IP Services combine proven performance with global internet reach and scalability. We operate a vast IP backbone, enabling us to offer customers proven service, even for standard requirements. From low to high speeds, our IP services are designed to deliver maximum performance in virtually any location.

Technical Features / Capabilities

ACCESS OPTIONS

- Cross Connects: IP-enabled facilities are only a cross connect away from our IP Backbone.
- Backhaul Options: Multiple backhaul options to extend the reach of our IP network to your customer premise.
- Metro and long-haul TDM Private Line service
- CenturyLink® Metro Ethernet Private Line service
- Metro and long-haul 2.5 Gbps and 10 Gbps wavelength services.
- CenturyLink® Dark Fiber extensions.

PORT INTERFACES

- Ethernet connections from 10/100 Mbps ports to 10Gbps ports & *100GE
- TDM/Sonet–DS-3, OC-3, OC-12, OC-48.
- Full and fractional port speeds.

BILLING OPTIONS

- Fixed Rate Ports: Flat-rate MRC for the port, no additional usage charges to help you manage your budget.
- Usage-Based Billing: Flat-rate MRC for Committed Data Rate (CDR) plus burst charges based on usage above CDR. You can burst to full line rate of interface.

Why Choose CenturyLink for Internet Services?

Efficiently support your growing business with our scale, reliability and global reach.

- IP backbone serving over 500 global markets deliver a superior customer experience utilizing our high-performance network.
- Expansive peering capacity of more than 21Tbps at 66 unique locations globally, and connectivity to over 4,200 Autonomous Systems globally.
- Serving eight of the top 10 U.S. internet service providers (ISPs).

Future-proof your business with services engineered to meet the demands of today and tomorrow.

- Flexible range of high-speed service options.
- IPv4/IPv6 dual stack and an inventory of IPv4 addresses.

Protect your organization and end users with sophisticated security solutions.

- Network-level protection with sophisticated traffic monitoring tools, and enhanced SPAM filtering included.
- Full, in-house Managed Security services and DDoS mitigation to provide a single stop for all your managed security needs.
- Dedicated, centralized security organization with redundant Security Operation Centers, CenturyLink Professional Security Consulting services, and 24/7 monitoring and management.
