

SECURITY SOLUTIONS: PERFORMANCE-DRIVEN, SECURE AND EXPERIENCED

SOLUTIONS CONSULTING

Today's global businesses face increasing global security threats. Open network, mobile workforces, and shared data with business partners and suppliers increase your connectivity — exposing risk across all these aspects.

THE SECURITY CHALLENGES YOUR ENTERPRISE NOW FACES

Building and maintaining security is expensive and complex. Solutions Consulting can help you find cost-effective, flexible ways to enhance your security services and continually monitor them. We help enterprises like yours tailor a program, customized to meet your specific needs. Our security professionals develop a risk-mitigated plan to ensure that security extends across your IT operations.

THE CENTURYLINK TECHNOLOGY SOLUTIONS DIFFERENCE

CenturyLink's Security Consulting stands apart — a dedicated staff with industry-leading credentials and experience delivering end-to-end solutions across industries and enterprises. Our professionals proactively identify network, data, application and enterprise-level threats, risks, vulnerabilities and cyber security issues — all based on your specific applicable compliance requirements and frameworks, as well as industry defined security standards.

Consulting solutions prioritize and protect information according to its business value — wherever it needs to be, whoever needs to access it, and however it is used. We can help you prioritize your security spend to address your most urgent security issues and gaps now.

CenturyLink has earned its reputation for client satisfaction and technical excellence by continually delivering secure, proven solutions.

SECURITY OPTIONS

Securing your enterprise is more than a local IT challenge; today it is a global challenge, requiring experience in global security solutions. CenturyLink is committed to helping clients secure the information their workforce and enterprise partners need to access.

This ongoing comprehensive security program includes collecting and analyzing your aggregate security and compliance requirements, risk and compliance controls and your business needs.

CenturyLink Retainer-based Services include:

- Log Monitoring Services (LMS)
- Firewall security monitoring services
- Intrusion detection and prevention services (NIDS/HIDS)
- Incident response analysis services
- Distributed Denial of Service (DDoS) mitigation services
- Threat and Vulnerability Assessments and Penetration Testing (across networks and applications)
- Web Application Firewall (WAF) Configuration and Log Review Services
- Network forensics and investigative response services
- Risk and Compliance assessments (PCI, ISO 27001/2, HIPAA etc)
- Change Management and Security run-book/documentation assistance
- Security metrics reporting and monitoring services

SECurity-as-a-Service (SECaaS)

CenturyLink also offers recurring services under a broader umbrella through SECurity-as-a-Service to include services across these towers:

- Identity and Access Management
- IT Governance Risk and Compliance
- Network Security
- Application Security
- Cyber Security
- Enterprise and Data Security

CenturyLink is an industry leader in infrastructure platforms — from collocation to cloud. And no one knows security like CenturyLink.

Contact us today to bring that security and peace-of-mind to your entire enterprise.
