

CENTURYLINK® CLOUD CONNECT – DYNAMIC CONNECTIONS

EXPERIENCE REAL-TIME NETWORK PROVISIONING

CenturyLink® Cloud Connect – Dynamic Connections provides secure, real-time connectivity to your data center and cloud environments. Using the secure portal or API integration, you choose the bandwidth speed and which locations to connect, when you demand it. With a pay-as-you-go model, you have the control and flexibility to better manage network infrastructure expenses. And by utilizing our private network, your connection is inherently secure and exposure to external threats is minimized. CenturyLink’s vast network, widespread visibility and portfolio of security services add additional layers of protection.

Why Choose CenturyLink Dynamic Connections?

Fast Provisioning of Data Connections

Create or disconnect private Ethernet connections to cloud and data center environments – in real-time – via the self-serve portal or API integration.

Pay-As-You-Go

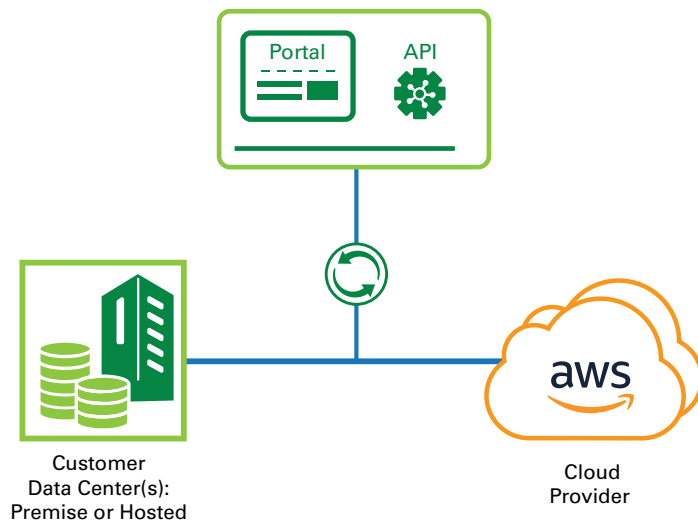

Billing on a pay-as-you-go model; Every Dynamic Connection is on an hourly rate with no long-term contract and no early termination fees.*

Secure Connectivity

Private Ethernet connectivity helps to protect data and eliminates the need to rely on the public Internet.

Global Reach

Connected to one of the world’s largest public cloud providers, access to over 2,200 third-party data centers and 100,000 buildings on-net in North America, Europe and Asia-Pacific.

CenturyLink Dynamic Connections links your data center and cloud environments in real-time, so you get a fast, secure and flexible network experience.

Technical Features / Capabilities

- Accelerates order delivery from days or weeks to near real-time
- Access the service via secure portal or API integration
- Connectivity with over 2,200 third-party data center locations globally
- Private MEF Carrier Ethernet 2.0 connections over CenturyLink's highly redundant global fiber network
- Near real-time turn up and turn down of connections between your data centers and cloud providers
- Billing on a pay-as-you-go model; Every Dynamic Connection is on an hourly rate with no long-term contract and no early termination fees*
- As a private network, your connection is inherently secure and exposure to external threats is minimized

Why Choose CenturyLink for Your Cloud Connections?

- CenturyLink offers a full portfolio of solutions for your cloud connectivity. CenturyLink® Cloud Connect gives you choice and control, seamlessly linking your private and public cloud environments over private, pre-established connections to leading cloud service providers.
- Our global reach and extensive Wavelength, Ethernet and IP VPN connectivity options are designed to meet today's hybrid cloud requirements and provide you with connectivity as flexible and agile as your cloud experience.
- CenturyLink provides secure, high-performance connections to Amazon Web Services, Microsoft Azure, Google Cloud, IBM Cloud, Oracle Cloud Infrastructure and many other leading public and private clouds along with over 2,200 third-party data centers.
