

CenturyLink® Business Wi-Fi

A simple and secure solution with enterprise Wi-Fi features — paired with powerful CenturyLink network service.

CenturyLink Business Wi-Fi is a great fit for businesses that:

- Subscribe to CenturyLink Network services including Fiber+, Core Connect Enterprise, IQ with public port, and Ethernet
- Have 5 or fewer locations with up to 8 access points each
- Need a fast and standardized Wi-Fi deployment plan
- Have limited IT resources and want to standardize Wi-Fi across their business locations
- Desire secure Wi-Fi for both customers and employees, with visibility into Wi-Fi traffic patterns, bandwidth usage and customer usage to drive brand loyalty
- Need a simple Wi-Fi solution that can be centrally monitored from virtually anywhere
- Would like to incorporate business brand into the guest Wi-Fi experience

CenturyLink Business Wi-Fi delivers:

- Convenient billing per access point, in addition to CenturyLink powerful network — no need to purchase equipment
- Enhanced employee and customer wireless experience
- Enterprise-grade Wi-Fi that's easy to set up in a flash
- Enterprise-grade security — SSID authentication, separate customer and employee traffic and customer information is kept private
- Unsurpassed visibility over your Wi-Fi using a simple, comprehensive dashboard
- Features that aid with retail and healthcare industry compliance

CenturyLink Advanced Network Options
