

CenturyLink® Cloud Connect Dynamic Connections

DATA SHEET

Experience real-time network provisioning

CenturyLink® Cloud Connect Dynamic Connections provides secure, real-time connectivity to your data center and cloud environments. Using the secure portal or API integration, you choose the bandwidth speed and which locations to connect, when you demand it. With a pay-as-you-go model, you have the control and flexibility to better manage network infrastructure expenses. And by utilizing our private network, your connection is inherently secure and exposure to external threats is minimized. CenturyLink's vast network, widespread visibility, and portfolio of security services add additional layers of protection.

Why choose CenturyLink Dynamic Connections?

Fast Provisioning of Data Connections

Connect or disconnect private Ethernet services to cloud and data center environments in real-time via the self-serve portal or API integration.

Pay-As-You-Go

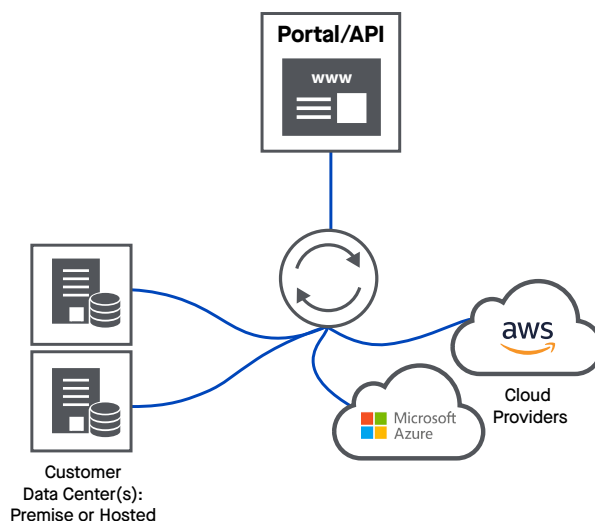

Pay for what you use; every dynamic connection is on an hourly rate with no long-term contract and no early termination fees.*

Secure Connectivity

By utilizing the CenturyLink private network, your connection is inherently secure, minimizing your exposure to external threats.

Global Reach

We are connected to one of the world's largest public cloud providers, with access to over 2,200 third-party data centers and 150,000 on-net buildings in North America, Europe and Asia-Pacific.

- CenturyLink® Dynamic Connections links your data center and cloud environments in real-time. Get a fast, secure and flexible link between your data center and cloud environments.
- Accelerate order delivery from days or weeks to near real-time.
- Access the service via secure portal or API integration.

Contact your CenturyLink representative to learn more.

*A CenturyLink master services agreement for network services with minimum term and early termination fees is required to gain access to Dynamic Connections.
