

# CenturyLink® Digital Commerce (high-availability)

Comprehensive managed hosting services and eCommerce expertise to ensure the resiliency, uptime and integration of your end-to-end digital customer experience ecosystem, including web servers, eCommerce and WCM applications, order and fulfillment systems, network connectivity, and databases.

CenturyLink optimizes your eCommerce platform with flexible enterprise-class hybrid hosting environments, reliable high-speed connectivity, and comprehensive application development and managed services for your entire online presence. Enhance your digital customer experience by improving uptime and data security, expanding to new geos, or integrating POS, loyalty rewards, payment and fulfillment within your eCommerce systems for a centralized real-time view of customer data and analytics across platforms.

CenturyLink's high-availability Digital Commerce solution enables simplified processes for development, QA/test, staging/performance, disaster recovery, and PCI compliance. Available globally in all 60+ data centers, CenturyLink's® Dedicated Cloud infrastructure coupled with Dedicated Server Hosting delivers the flexibility and reliability needed to scale during peak traffic times.

## Technical Specifications

- Managed Infrastructure and Application Services including Application Management & Development, OS, DB, Infrastructure and Network Management, Managed Backup and Storage, and Disaster Recovery
- Dynatrace Application and Infrastructure Monitoring of within the environment as well as outside/in monitoring
- Scalable virtual infrastructure based on private cloud, physical HPE DB servers, security, Unified Storage and MPLS
- Dedicated HP DL Gen8 and Gen9 Series hardware
- Guest OS VM Sizing up to 32 vCPU and 1 TB of vRAM
- VMDK's for the Cluster supported up to 16 TB
- VMware vCenter Server, ESX and virtual machine configurations designed for compliance
- Dedicated volumes of NetApp storage and LUN masking for each Guest OS instance
- Shared or dedicated SAN attached storage
- Server connectivity with multiple GigE or 10 GigE links
- Managed Security Services including DDoS Mitigation, Host Based IDS, Threat Management, Log Management, and Managed WAF.
- Integration of complimenting solutions expertise like Big Data & Advanced Analytics
- 24/7 responsive support
