

REFERENCE ARCHITECTURE

CENTURYLINK GEOMAX®

The GeoMax solution provides a customized, fully private dedicated network ring including equipment and fiber to support customer needs. GeoMax offers multiple interfaces needed for customer connections between data centers, campus environments and branch offices.

For businesses that require more advanced ring configurations connecting multiple locations, GeoMax provides a custom solution to meet those needs. The service is supported by a full time Network Operations Center (NOC) dedicated specifically for GeoMax customers. Supports up to 100Gbps connections for heavy data users.

- Business continuity/disaster recovery capabilities
- Transport to support HD video conferencing and broadcast applications
- Synchronization of CRM databases
- Delivered on a single platform to ensure interoperability and operational efficiency
- Designed to work with CenturyLink® Metro Ethernet service
- Available within the same LATA within the following states: AZ, CO, IA, ID, MN, MT, ND, NE, NM, OR, SD, UT, WA, WY

Flexibility That Includes Several Protocol And Design Options

- Scalable up to 100Gbps to accommodate high traffic demands
- Supports optical add/drop capability at the individual customer locations and central office nodes
- Broad fiber footprint that gives you access to thousands of on-net sites
- Platform supports up to 88 wavelengths
