

CENTURYLINK® MANAGED VIDEO CONFERENCING

LEVERAGE YOUR EXISTING NETWORK FOR SIMPLIFIED COLLABORATION

There is no replacement for the impact of having a face-to-face meeting with critical stakeholders. But with the costs and hassles of travel, you need a way to create that impact without relying on time consuming transportation. After all, time is your most limited resource.

CenturyLink® Managed Video Conferencing services allow you to connect face-to-face with stakeholders around the world – without the challenges and costs of traveling. Get the immediacy and impact only streaming and video conferencing can provide. We leverage IP VPN-enabled, global network to seamlessly deliver video and other applications through a single VPN port and local loop. Utilize our intelligent network to enable the highest quality video and audio for yourself and your participants.

Business Solutions

- **Cost-Effective:** Our converged IP VPN-enabled global network, can cost-effectively provide the reach, efficiency, flexibility, and quality you need to realize the true value of video conferencing and increase productivity.
- **Connection Compatibility:** CenturyLink supports ISDN video conferencing and IP video.
- **Interoperability:** We developed an interop platform that allows you to connect to standard, high definition and telepresence equipment across the globe.

Connecting geographically dispersed employees, customers, partners and suppliers around the world at a moment's notice has never been easier.

CenturyLink's Collaboration Solutions offer a suite of audio, video and web-conferencing services that help you boost workplace productivity while maximizing your organization's time, resources and global communications.

CenturyLink lets you meet with confidence using a web conferencing service that is simple, intuitive, highly reliable and makes it easy to host or join a meeting.

Technical Features / Capabilities

- Interoperable with traditional video conferencing systems
- Low-jitter MPLS WAN
- CenturyLink's Smart WAN
- For larger events: A single URL provides access to the event
- Simple onboarding: No downloads or plug-ins are required
- Global fiber optic network to ensure maximum reliability and availability
- Features MPLS connection with quality of service (QoS)

Why Choose CenturyLink® Managed Video Conferencing?

- **We Own Our Network:** The collaboration network is the same telecommunications network used by our data and voice customers. This allows us to streamline your video delivery and control your conference quality.
- **CenturyLink® Smart WAN Service:** We match our MCU bridges around the world to the needs of your conference, which provides you with the best quality possible.
- **Video endpoint management:** We help ensure your on-premise equipment is functioning effectively and efficiently.
- **Experienced Experts:** The long tenure of our Collaboration Services team members allows you to benefit from our industry expertise and premium customer service.
- **Proven Call Quality:** Ditech Echo Cancellers architecture, installed as a network augment, supports enhanced and proven international call quality.
- **Disaster Avoidance Strategy:** We support you with load balancing, dual provisioning, failover, and alternate routing to other bridges.
- **Strong Intercarrier Relationships:** We have the advantage of leveraging our existing carrier volumes and relationships globally for aggressive pricing solutions, quicker service delivery and faster trouble resolution.
