

## DATA CENTER SPECIFICATIONS

# BRIS1: Brisbane, Australia

Cyxtera provides comprehensive data center solutions, for clients of all sizes. From a single cabinet to a megawatt or more of data center capacity, which enables you to deliver a high level of business efficiency, while reducing costs and increasing your opportunity to achieve business growth. Today, Cyxtera operates 50+ data centers with over 195MW of power across almost 2.6M/sq. ft. of raised floor capacity. Our global data center footprint extends around the world, enabling Cyxtera to efficiently deliver our services locally and connecting you globally to your business partners, end users, and customers. Partnering with NEXTDC has allowed Cyxtera to offer the same quality of service in Australia. We provide you:

- Ability to focus on core business competencies rather than data center management
- Capital and operational expense savings for data center facilities, maintenance and power consumption
- Access to leading cloud and managed service providers to enable optimal platform deployment for each workload

We are an innovative global data center service provider with quality colocation, security expertise and outstanding customer support. Cyxtera colocation customers have access to an ecosystem of leading providers of public and private cloud, managed hosting, managed security, storage, and network services; all in some of the best run data centers in the industry.

- Worldwide teams with extensive expertise in data center operations, customer support, engineering and consulting
- With 50+ global data centers in North America, Europe and Asia-Pacific, Cyxtera locations are ideal for geographic redundancy, IT asset protection and equipment failover
- Direct access to Hybrid IT services from multiple providers
- Cyxtera can enhance speed to market by leveraging our Structured Cabling and Gold Support
- Reliability and scalability
- Network connectivity and carrier diversity

### Data Center Statistics

#### Real Estate Summary

- Located above the flood lines of 1974 and 2011 floods
- Six-story 2,900m<sup>2</sup> building
- 500mm of raised floor space

#### Electrical Summary

- Multiple power distribution units (PDU) providing N+N final circuit to racks
- Generator configuration = N + 1
- Building Management System (BMS) for monitoring of major mechanical systems
- Access to 5 MVA Power
- Minimum 12 hour onsite fuel supply

#### Mechanical Summary

- Cooling system configuration = N + 1
- Cyxtera manages humidity and temperature to strict ASHRAE standard

#### Fire Detection and Suppression Summary

- Inert gas fire suppression system
- Water mist suppression system in DRUPS enclosures.
- Fire Indicator Panel (FIP), mimic panels, heat detection and MASD sprinkler system

**Cyxtera Technologies** is the secure infrastructure company. Combining a hybrid-ready information security fabric with a global footprint of best-in-class data centers, Cyxtera delivers a secure platform for connecting and protecting dedicated infrastructure, private clouds and public clouds.

For enterprises, government agencies and service providers, Cyxtera offers powerful, secure IT infrastructure paired with agile, dynamic software-defined security. Headquartered in Miami, Cyxtera serves more than 3,500 customers worldwide.

## Security and Compliance

Cyxtera and NEXTDC utilize a centralized global security operations center that monitors all Cyxtera data centers, provides multiple challenge points throughout and grants permissions-based access to all data center areas. Each data center supports hundreds of external and internal video surveillance cameras. Standard cages and cabinets are outfitted with locking mechanisms. Customers have the ability to add incremental security options such as intra cage video cameras and card or biometric readers.

This facility is SSAE-16 and ISO 27001:2005 Information Security Management System certification.

---

## Connectivity

Whether a customer needs a connection between cages, between buildings or to a carrier, cross connects are the lifeblood of data center connectivity. Cyxtera offers industry standard agnostic CAT5E, COAX and Singlemode/Multimode Fiber connectivity at all our data centers. Cross connects support all transport connectivity options to carriers within the facility, multiple customer cages within the same facility, and multiple environments in separate data centers. The data center can enable connections to numerous services via a cross connect to our node room where network, cloud, managed hosting, security, and storage services providers, maintain a point of presence. Access to key financial exchanges and market data feeds are available within select Cyxtera financial data centers.

Cross connects are delivered within 48 hours.

## Areas We Serve

### United States

Albuquerque, NM  
Atlanta, GA  
Boston, MA  
Chicago, IL  
Columbus, OH  
Dallas, TX  
Denver, CO  
LA/Orange Co., CA  
Las Vegas, NV  
Metro NY/NJ  
Minneapolis, MN  
Moses Lake, WA  
Phoenix, AZ  
Central, WA  
Seattle, WA  
Silicon Valley, CA  
St. Louis, MO  
Tampa, FL  
Washington, D.C.

### Canada

Montreal  
Toronto  
Vancouver

### Europe, Middle East, Africa

Germany  
London

### Asia

Hong Kong  
Singapore  
Shanghai  
Tokyo

### Australia
