AVAILABLE DATA CENTRE SPACE

## HAYES, LONDON

Why CenturyLink?

Built with multiple security layers, redundant power systems and designed for 99.999% power availability, CenturyLink provides you colocation services with the safety and reliability you need to keep your business running smoothly. Colocation at CenturyLink's newest gateway gives you direct access to one of the largest and most advanced next-generation, fiber-optic networks.

CenturyLink's new London gateway facility has over 750m² of data centre space, with another 1000m² of expansion space available.

LOCATION

Hayes is situated 20km (12 miles) west of the city of London. It is ideally located with excellent access into central London (20 minutes to Paddington by train), to major motorways (the M4 and M25 are within 5 miles) and to both Heathrow and Gatwick airports.

Hayes offers direct connectivity to the Level 3 global Internet backbone with close proximity to two fiber backhaul routes, linking London to transatlantic cable routes. Critical Power Capacity: Up to 1 MW of critical load capability, isolated 2N UPS configuration delivered through independent 1000 amp buses. All UPSs are
