

CenturyLink Solutions for SAP with Cisco UCS

Comprehensive SAP applications and HANA solutions to simplify business processes and expedite analytical insights

To accelerate enterprise digital transformation, CenturyLink continues to innovate its global SAP solutions with new technologies and strong partnerships, like its long-standing relationship with Cisco, the #1 SAP HANA server infrastructure vendor¹. CenturyLink Solutions for SAP with Cisco UCS are setting a new standard in time to value and quality of service for global enterprise SAP ecosystems. Our SAP-specific consulting, managed services, and data science expertise help to further optimize your SAP applications, infrastructure, and use of data analytics.

This latest innovation, in conjunction with NetApp and Vnomic, provides policy-driven delivery, security, governance, high-availability, and disaster recovery in virtualized or bare metal private cloud environments.

The solution's automated delivery and governance software from Vnomic ties the power of application modeling with SAP HANA, Vora, and Hadoop, to the flexibility of Cisco Unified Computing Systems (UCS) and Application Centric Infrastructure (ACI) for rapidly deploying and configuring applications with programmable, policy-based automation. The policy-driven governance and auditability of the solution automates the delivery of SAP HANA landscapes, while enforcing your company's specific security and governance requirements, for rapid deployment and improved security.

Rapid Deployment, Simplified Management, and Improved Governance of SAP Ecosystems

DEEP SAP & ANALYTICS EXPERTISE

Drive efficiencies, enhance security, and improve business insight by leveraging our certified SAP and Data Science experts delivering consulting, implementation, and ongoing management of your SAP ecosystem.

RAPID DEPLOYMENT & POLICY-DRIVEN AUTOMATION

Reduce complexity and risk by improving governance with application-centric automation tools for standardizing deployments and infrastructure configuration.

COMPREHENSIVE SAP SOLUTIONS

Optimize your SAP ecosystem while reducing cost and complexity with the one strategic partner you'll need for your SAP environment.
