DP720 Registration/Pairing

Registering a DP720 handset to a DP750 base unit:

1. On the DP750 Base station, press and hold the **Radio** button on the back of the device, for 7 seconds until the **Radio LED** icon begins to blink.
2. On the DP720 handset, press **Menu > Settings > Registration > Register** while the Radio LED icon is blinking.
3. Select **BaseX** (X=1-4) corresponding to the desired base station DP750 you need to register/pair to.
4. Press the **Subscribe** soft key.
5. The DP720 searches for nearby base stations and displays the base station name of the discovered DP750.
6. Press **Subscribe** to pair with the displayed DP750.
7. The DP720 displays **Easy Pairing** on the LCD and plays an audible buzz when successful.
8. You're returned to the home screen, displaying the handset name and number assigned by the registered base station.

Feature Overview

Using Navigation and Soft Keys

- Press the **Menu** soft key, then use the **Up/Down/Left/Right Navigation** keys to scroll through various options. With an option highlighted, press the **OK** button in the center of the navigation keys or the **Select** soft key, to make your selection.
- Use the **Navigation** keys, the **OK** button, and **Soft Keys** at the bottom of the display, to manage features within **Menu** while on active calls for call processing functionality.

Voicemail

Accessing Voicemail:

1. Press the **Menu** soft key.
2. Navigate to **Voice Mail**, and press the **Select** soft key.
3. With **Play Message** highlighted, press the **Select** soft key.
4. With the correct Line highlighted, press the **Select** soft key.
5. When the prompted, enter your **passcode** followed by **#**.
6. Listen to new and saved messages, and access mailbox options.

Making/Ending Calls

Making a Call:

1. Enter a **10-digit number**, or **extension**, on the keypad.
2. To use the handset: press the **Green** handset button to send your call.
3. To use the speakerphone: press the **Speakerphone** to send your call.

Ending an Active Call:

1. Press the **Red** handset button to end any active call.

Answering Incoming Calls

Answering a Call:

1. Press the **Green** handset button or the **Speakerphone** button.

Answering an Incoming Call While on an Active Call

1. You'll hear a tone when receiving an incoming call.
2. Press the **Answer** soft key.
3. This automatically places your existing caller on hold.

Hold/Resume/Disconnect

Placing an Active Call on Hold:

1. Press the **Hold** soft key.

Returning to a Held Call:

1. Press the **Resume** soft key.

Ending an Active Call:

1. Press the **Red** handset button to end any active call.

Conference (3-Way Calling)

Placing a 3-Way Conference Call:

1. While on an active call, press the **Options** soft key.
2. Navigate down to **New Call** and press the **Select** soft key, which places your existing call on hold.
3. Enter a **10-digit number** or **extension**, then press the **Send** soft key.
4. Announce the conference call, then press the **Options** soft key.
5. Navigate down to **Conference**, and press the **Select** soft key to join all parties into one call.

Ending a Conference Call:

1. Press the **Red** handset button to drop all parties and end the conference call.

Transfer (Blind - Unsupervised)

Blind-Unsupervised Transfer does not allow you to announce the call:

Blind Transfer:

1. While on an active call, press the **Options** soft key.
2. With **Transfer** highlighted, press the **Select** soft key.
3. Enter a **10-digit number** or **extension** to transfer to.
4. Press the **Transfer** soft key.

You're dropped from the call and the transfer completes with no opportunity to announce the caller.

Transfer (Consultative - Supervised)

Consultative Transfer allows you to announce the call before completing the transfer:

Consultative Transfer:

1. While on an active call, press the **Options** soft key.
2. Navigate down to **New Call** and press the **Select** soft key.
3. Enter a **10-digit number** or **extension** to transfer to and press the **Send** soft key.
4. When the party answers, announce the transfer.
5. Press the **Options** soft key.
6. With **Transfer** highlighted, press the **Select** soft key.

You're dropped from the call after announcing the transfer, and the transfer is complete.

Cancel Consultative Transfer:

1. If the party chooses not to accept the transfer, press the **Red** handset button to disconnect that call.
2. Press the **Resume** soft key to return to your caller.

Call Forwarding

Enabling and disabling **Call Forward Always** must be accomplished using FAC's (feature access codes). You cannot use the Forwarding option under **Menu > Call Settings > Forward**:

To Enable Forwarding:

1. On the keypad, enter ***72+10-digit number** or **extension** you want to forward to.
2. Press the **Green** handset button or the **Speakerphone** button to send the call.
3. Receive an audible that your call forwarding service has been activated successfully.

To Disable Forwarding:

1. On the keypad, enter ***73**.
2. Press the **Green** handset button or the **Speakerphone** button to send the call.
3. Receive an audible that your call forwarding always service has been deactivated successfully.

Do Not Disturb (DND)

From the handset, place any line appearing on the device in DND mode; incoming calls roll to voicemail when with DND enabled:

To Enable DND:

1. Press the **Menu** soft key.
2. Navigate down to **Call Settings**, and press the **Select** soft key.
3. With **Do Not Disturb** highlighted, press the **Select** soft key.
4. With the correct line highlighted, press the **Select** soft key.
5. Navigate up to highlight **Enabled**, press the **Save** soft key.

To Disable DND:

1. Press the **Menu** soft key.
2. Navigate down to **Call Settings**, and press the **Select** soft key.
3. With **Do Not Disturb** highlighted, press the **Select** soft key.
4. With the correct line highlighted, press the **Select** soft key.
5. Navigate down to highlight **Disabled**, press the **Save** soft key.

Contacts – Add New Contact

Manually add private or shared contacts. **Private** contacts appear within contacts on your handset only, **Shared** contacts appears within contacts on every handset paired to the same base unit:

To Add a New Contact:

1. Press the **Menu** soft key.
2. With **Contacts** highlighted, press the **Select** soft key.
3. Use the up/down navigation key to select **Private** or **Shared**, and press the select soft key.
4. Press the **Options** soft key.
5. Navigate down to highlight **New Contact**, press the **Select** soft key.
6. Using the letters on the keypad, enter a **First Name, Last Name** for your contact
7. Enter at least one number in the Home, Work or Mobile fields (only one number is required, but if numbers are added to each field, each number can be dialed for that contact).
8. Use the left/right navigation keys to assign a unique **Melody** for that contact.
9. Press the **Save** soft key.

Contacts – Dialing From

Numbers can be dialed for **Contacts** saved to either the **Private** or **Shared** contacts list:

To Dial from a Contracts list:

1. Press the **Menu** soft key.
2. With **Contacts** highlighted, press the **Select** soft key.
3. Use the up/down navigation key to select **Private** or **Shared**, and press the **Select** soft key.
4. Use the up/down navigation keys to locate your contact, and press the **Options** soft key.
5. Navigate down to **Edit Dial**, and press the **Select** soft key.
6. With the number displayed, click the **Call** soft key which places your call.

Call History Logs

The DP720 handset contains call history logs for missed, accepted and outgoing call records. Records can be deleted on an individual basis, or delete all call records from all call logs at once.

To Access Call History logs:

1. Press the **Menu** soft key.
2. Navigate to **Call History**, and press the **Select** soft key.
3. Use the up/down navigation keys to select the call record type you wish to review.
4. Once highlighted, press the **Select** soft key.
5. Use the up/down navigation keys to roll through records for that call type.

To Delete all Call History logs from all Call Types:

1. Press the **Menu** soft key.
2. Navigate to **Call History**, and press the **Select** soft key.
3. Navigate down to **All Calls**, and press the **Select** soft key.
4. Press the **Options** soft key, navigate down to **Delete All**, and press the **Select** soft key.
5. Press the **Yes** soft key to confirm the deletion, press the **No** soft key to cancel the deletion.

Call History Logs – Save to Contacts

Contacts can be added manually from the handset, but call records can also be saved from the **Call History** Logs:

To Save a Call History Record to Contacts:

1. Press the **Menu** soft key.
2. Navigate to **Call History**, and press the **Select** soft key.
3. Navigate to the appropriate call record type (**Missed**, **Accepted** or **Outgoing**).
4. Use the up/down navigation keys to highlight **Add To Contacts [P]** or **Add to Contacts [S]****, and press the **Select** soft key.
5. Retain prepopulated **FirstName/LastName** information, or use the letters on the keypad to enter a new first/last name.
6. Confirm the number is correct, and add addition numbers if necessary.
7. Use the left/right navigation keys to assign a unique **Melody** for that contact.
8. Press the **Save** soft key.

***[P] = Private Contact list, [S] = Shared – all contacts added to shared appear on all cordless handsets associated to the same base unit.*

Call History Logs – Dialing From

In addition to reviewing call information, outbound calls can be made from history logs, if the telephone number recorded within the record is valid:

To Dial from Call History logs:

1. Press the **Menu** soft key.
2. Navigate to the appropriate call record type (**Missed**, **Accepted** or **Outgoing**).
3. Use the up/down navigation keys to locate your record.
4. Once found, press the **Options** soft key.
5. Navigate down to highlight **Edit Dial**, and press the **Select** soft key.
6. With the number displayed, click the **Call** soft key which places your call.

Ring Tones

Choose from 9 different Ring Tones for incoming calls:

Reviewing/Changing Ring Tone:

1. Press the **Menu** soft key.
2. Navigate to **Settings**, and press the **Select** soft key.
3. Navigate down to **Audio**, and press the **Select** soft key.
4. Navigate down to **Ringtones**, and press the **Select** soft key.
5. Choose from **Ring 1-8** or **System Ring**.
6. Navigate down to listen to each ring type, pressing the **Select** soft key when you decide on your ring tone.

Handset Name

Each handset can be assigned a unique name, so if more than one handset is registered/paired to a DP750 base unit, it can be easily identified if misplaced:

Defining Handset Name:

1. Press the **Menu** soft key.
2. Navigate to **Settings**, and press the **Select** soft key.
3. Navigate to **Handset Name**, and press the **Select** soft key.
4. Delete the default name in the **Handset Name** field, by pressing the **Delete** soft key.
5. Using letters on the key pad, enter the new name, and press the **Rename** soft key when completed.
6. The new **Handset Name** appears in the upper right corner of the display for easy identification.
