

VOLUME 1, SECTION 3.0: TRANSPORT/OPTICAL/IP SERVICES

3.0 TRANSPORT/OPTICAL/IP SERVICES

[REDACTED] for GSA's Networkx Program combines Level 3's world-class [REDACTED] network and broad geographic coverage [REDACTED]
[REDACTED]

Our proposed offering for the Networkx mandatory and optional services is based on Level 3's proven infrastructure and service delivery processes that we use to support customers worldwide. A key feature of our offering is the Level 3 backbone network. This fiber optic network was designed and installed by Level 3. We control the operation and configuration of the system. As a result, our customers are ensured of timely maintenance, quality upgrades, and high availability of services.

We are an international Tier 1 Internet Service Provider (ISP). [REDACTED]
[REDACTED]

[REDACTED] We offer a variety of port speeds and access methods giving Government agency clients flexibility in communications services that will be cost-effective and meet their connectivity needs.

This section of our proposal addresses the requirements in Section L.34.1.4 of the RFP. Our response is organized with a subsection for each mandatory service followed by subsections for each proposed optional service. In addition to the mandatory services: Internet Protocol Services (IPS), Network-based IP Virtual Private Network (NBIP-VPN), and Voice over IP Transport Services (VOIPTS), Level 3 proposes to provide the following optional services under Networkx:

- [REDACTED]

The [REDACTED] offering leverages a common infrastructure and network backbone. Therefore, our response addressing Section L.34.1.4.1 requirements is largely the same no matter which of the services is being discussed. In those cases, we refer to the appropriate detailed response within this volume rather than repeating the material
