2.4 DISASTER RECOVERY [C.3.3.3, F. 2(38), M3.9]

Introduction: The Level 3 Network, [REDACTED]

[REDACTED] was built with business continuity in mind, using physical plant components and redundant systems to support continuous, uninterrupted services for our customers. Hardware, however, is only part of the solution. Advance planning to develop and rehearse processes that capitalize on all of our assets and enable us to recover our services quickly remains the key to the Level 3 success in disaster recovery.
