

WITS 3

NEXT-GENERATION TECHNOLOGY SOLUTIONS FOR FEDERAL AGENCIES

As a federal agency, you're tasked to ensure your communication architectures address and align with the larger goals of government and the needs of citizens. You must deliver flexible, scalable and state-of-the-art solutions that allow for an open and participatory government — increasingly accessible and transparent to its people.

Your Connection to IT Modernization

Whether your agency is looking to connect a mobile workforce, move applications to the cloud, consolidate data centers or broadcast live coverage to a global audience, CenturyLink has you covered.

More importantly, we deliver the cost-effective voice, networking, cloud, security and professional services you need to solve them.

Equipping You for Reliable Network Performance — Today and Tomorrow We've engineered our network for maximum performance and reliability through:

- Diverse entrance facilities, dual gateway designs and a variety of diversity and protection options
- Continuously upgradeable multi-conduit network augmented regularly for capacity and headroom at all layers
- Fully staffed 24/7 Network Operations Centers (NOCs) engineered with hot-swap capabilities for resilient service

Support in the National Capital Region

CenturyLink combines the network reach and scale you need with National Capital Region-focused assets designed to meet your specific mission objectives. Our strategic government team supports you with strategically located NCR data centers and colocation facilities. And since our Tier 1 network extends to more than 60 countries, we can support your mission-critical goals both across the country and around the globe.

Federal Agency Expertise

CenturyLink has a distinct combination of efficiency, scalability, quality and expertise in the federal sector — making us uniquely positioned to help federal agencies take advantage of new communications technologies. We are committed to understanding your specific requirements, building and operating next-generation solutions that meet your agency's needs. We have years of experience with managing the challenges that are inherent to large-scale network transitions enabling us to make your solutions on WITS 3 the quick, efficient, cost-efficient, modern and secure communications infrastructure that you require.

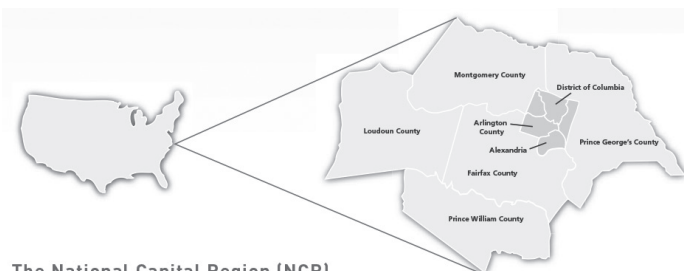

Comprehensive Service Portfolio

- **Hosted VoIP Service** - Simplify telecom management, lower capital expenses, improve end-user experience and prepare for the future by replacing legacy phone systems with SIP trunking.
- **Data Center Consolidation Services** - Support your data center consolidation efforts with customized solutions featuring low-latency, high-performance and fully managed architectures.
- **Cloud Infrastructure as a Service** - Eliminate core infrastructure costs with our enterprise-grade cloud technology, employed specifically to meet the security and reliability demands of federal agencies.
- **Unified Communications as a Service** - a large catalog of FedRAMP Ready collaboration services to enhance user experiences and management tools for full visibility and control, reducing your agency's total cost of ownership.
- **Disaster Recovery / COOP Solutions** - Continue operations even when disaster hits with the redundant, diverse CenturyLink network and a customized disaster plan, designed collaboratively with CenturyLink experts.
- **Website Acceleration Services** - Help ensure a consistent, high-quality web experience without the high cost of buying and managing the additional hardware and network capacity you need.
- **Content Delivery Services** - Scale and manage your networks to deliver the high-quality content the public demands without investing in more hardware, infrastructure or IT resources.

- **Broadcast Capabilities** - Deliver both standard and high-definition broadcast media securely to a global audience.

Learn More

CenturyLink stands ready to support your agency and WITS 3 program goals using one of the largest and most secure IP-optimized networks in the nation. We built our network to support mission-critical requirements by offering physical diversity and a large metro footprint.

The National Capital Region (NCR)

Find out how you can modernize your IT on a fixed budget and purchase exactly what you need from CenturyLink through easy-to-use government contract vehicles. Visit www.centurylink.com/federal today to learn more.
