

Network Disclosure Announcement No. 449

Public Notice of Network Change(s)
Pursuant to CFR 47, subsections 51.325 - 51.335.
QWEST's Internet address: <http://www.qwest.com/disclosures>.

Talking Call Waiting

Original Disclosure Date: February 11, 2000
Updated: December 17, 2001

Summary

This disclosure provides interface and deployment information on the Qwest Talking Call Waiting feature. This document provides an update to the location and timing of deployment section.

The Talking Call Waiting Feature (TCW) is a switch based feature enhancement to the existing Call Waiting feature and is available only on Nortel DMS100 and Lucent 5ESS switches and their subtending remotes.

The Talking Call Waiting feature works in conjunction with an out board Intelligent peripheral and permits a subscriber who is on a stable call in progress to hear the name of an incoming caller. The feature provides the spoken name immediately following delivery of the call waiting tone. After the name is heard the call reverts to the standard call waiting interface functionality. TCW inter-works with Calling Identity Delivery on Call Waiting (CIDCW) and normal Call Waiting.

TCW feature logic obtains the incoming caller's name utilizing a Signaling System 7 (SS7) calling name query to LIDB (Line Information Data Base). CNAM information is sent to an Intelligent Peripheral which, using text to speech conversion, speaks the waited caller's name to the TCW subscriber.

TCW is an end office software feature available on the Nortel DMS100 switching system as a software patch back to the NA010 generic and in general availability (RES NA00091) in the NA012 generic. In the 5ESS TCW is available as feature 99-5E-4605 in the 5E12 and later generics.

Locations and Timing of Deployment

Specific locations where the Talking Call Waiting Feature is available or planned can be found in Attachment 1. If the interface changes in the future Qwest will issue a new Network Disclosure. In addition, any new deployment locations will be added to the Qwest web site at <http://www.wwest.com/disclosures> in disclosure #449.

Interface Requirements
