

CenturyLink® Connected Voice with Air-Line™ Device

The CenturyLink® Connected Voice with Air-Line™ Device is designed to seamlessly upgrade your existing analog phone equipment to digital or Voice over Internet (VoIP) systems. Its onboard wireless 4G LTE service provides reliable connectivity without the need for a fixed copper or landline connection. This device is managed from an IP network, ensuring easy integration and enhanced functionality for a modern communication experience.

Key Features:

- 4G LTE internet with connectivity up to 150 Mbps
- 1 Gigabit Ethernet ports
- VoIP replaces conventional landlines to the home
- USB-C port supports backup battery operation from CenturyLink approved power banks to provide telephone service during power outages
- Automated configuration and secure firmware updates

Specifications:

Model Number: V1600A

LTE: LTE Category 4

LTE-FDD: B2/B4/B5/B12/B13/B14/B66/B71

MIMO: 2x1, 150Mb/s DL, 50Mb/S UL

Network Processor: 1.0GHz Dual-Core CA53

Ethernet Ports: One (1) 10/100/1000 Mbps Gigabit Ethernet port 1 (LAN) port

Voice: One (1) RJ11 Voice port provides connections to Voice over IP through CenturyLink Phone services

Memory: 512MB DDR3 Memory, 512MB Flash

Dimensions and Weight: Size: 6.3" (Length), 6.3" (Height), 1.65" (Width); Weight: 1 lbs.

Power Supply: External, 12VDC, 2.0A, only use the power supply adapter provided with this device

Certifications: FCC and UL Certified
