

Chapter 5: Dedicated Hosting (DH) Application

Overview

Introduction

The **Hosting Product** application allows you to manage your **DH (Dedicated Hosting)** services associated to your Control Center Enterprise ID. Some of the features available under the Hosting product include access to inventory, the ability to request & view reports and access to your account information through a Hosting Portal.

Note: In Control Center, the system will only display products that apply specifically to your customer account ID. If you do not have a Dedicated Hosting product this page will not display.

In this Chapter

This chapter contains the following topics:

Topic	See Page
Overview	1
Hosting Inventory	2
Viewing the Hosting Inventory	3
Sorting the Hosting Inventory	3
Hosting Reports	4
At a glance Reports	5
Viewing the At a glance Report	6

Accessing the Hosting Portal	20

Hosting Inventory

Introduction

The **Hosting Inventory** screen provides you information on your access circuits, a value representing the physical description of each listed connectivity circuit. This value is a combination of the switch, slot and port information uniquely describing the data connection to your rack.

Fields and Descriptions

The table below describes the fields and buttons displayed on the **Hosting Inventory** screen.

Field Name	Description
Access Circuit	This column displays a value representing the physical description of each listed connectivity circuit. This value is a combination of the switch, slot, and port information uniquely describing the data connection to your rack.
VLAN Name	This column displays a logical representation of the connectivity for each listed connectivity circuit. Your provider uses this value to locate your LAN (Local Area Network) for troubleshooting and maintenance.

Viewing the Hosting Inventory

Procedure Follow the steps in the procedure below to **view** the **Hosting Inventory** screen.

Step	Action
1	<p>From the Landing page, click on the Hosting service.</p> <p>Result: The Hosting drop down appears.</p> 
2	<p>From the Hosting dropdown, click on the Inventory link.</p> <p>Result: The Hosting Inventory screen appears.</p>  <p>Note: You can click any of the items in the drop down and navigate directly to that service for that product.</p>

Sorting the Hosting Inventory

Procedure Follow the steps in the procedure below to **sort** the **Hosting** list.

Step	Action
1	From the Hosting Inventory screen, click on the Access Circuit column label to sort the list by the circuit name.
2	From the Hosting Inventory screen, click on the VLAN Name column label to sort the list by the LAN name.

Hosting Reports

Introduction

The Hosting Product application provides you the ability to request and view a variety of reports, including:

- **At a glance**
- **Trend**
- **Billing**

Report Selections

The table below describes the available **Hosting** reports.

Field Name	Description
At a glance	The DH At a glance report provides information on the performance and bandwidth utilization in a graphical presentation for the selected circuit.
Trend	The DH Trend report provides information on trend variables in a graphical presentation for the selected circuit.
Billing	The DH Burstable Billing report provides information on the data points used to calculate the 95th percentile point for your internet service.

At a glance Reports

Introduction

The **DH At a glance Reports** screen provides you a listing of the At a glance reports that have been created for your Control Center Enterprise ID within the last 14 days. This screen is divided into two sections: Functions and Reports list.

- The **Functions** section of the screen allows you to generate an **At a glance** report.
- The **Reports** list displays an overview of the reports available.

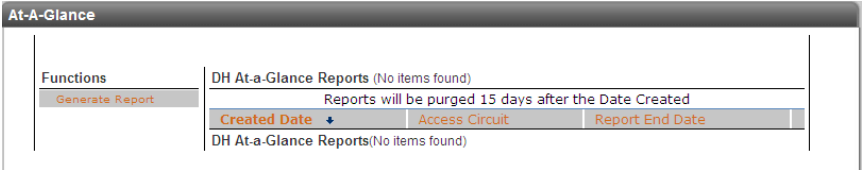

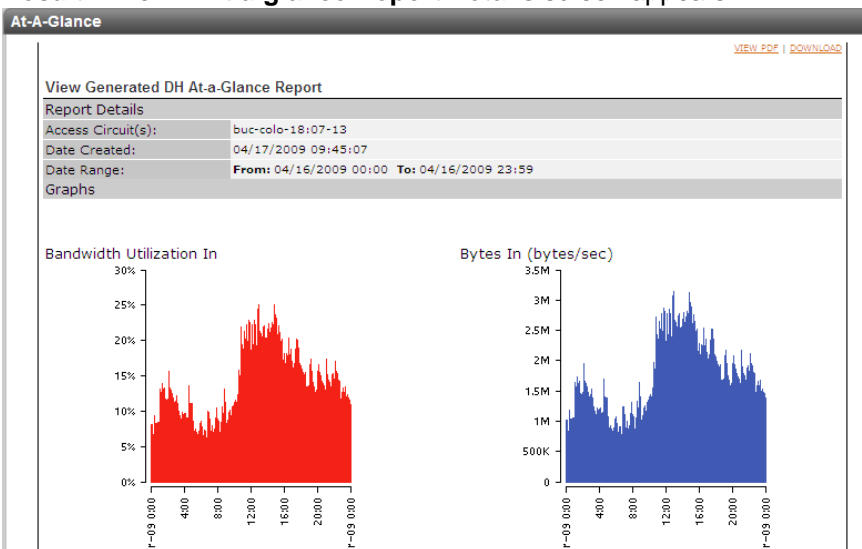

Fields and Descriptions

The table below describes the fields and buttons displayed on the **At a glance** report.

Field Name	Description
Functions Section	
Generate Report	This link allows you to generate an At a glance report.
Reports List Section	
Created Date	This column displays the date and time each listed report was generated.
Access Circuit	This column displays the Access Circuit on which the report was based.
Report End Date	This column displays the last date each listed report covers.
	This button allows you to view the selected report in a PDF (Portable Document Format) file version. Note: You will need at least the Adobe Acrobat Reader in order to open the PDF file.
Report Details Section	
Access Circuit(s)	This field displays the Access Circuit on which the report was based.
Date Created	This field displays the date and time the report was generated.
Date Range	This field displays the from date and time and the to date and time range the report covers
Report Graphs Section	
Bandwidth Utilization In	This graph shows you the percentage of your available inbound bandwidth used in each 24-hour period.
Bytes In (bytes/sec)	This graph shows you the number of bytes per second coming into your service component over each 24-hour period.
Bandwidth Utilization Out	This graph shows you the percentage of your available outbound bandwidth used in each 24-hour period.
Bytes Out (bytes/sec)	This graph shows you the number of bytes per second going out of your service component over each 24-hour period.
Bandwidth Utilization	This graph shows you the percentage of your total available bandwidth used in each 24-hour period.
Bytes (bytes/sec)	This graph shows you the total number of bytes per second going into and out of your service component over each 24-hour period.
	This button allows you to return to the previous screen viewed.

Viewing the At a glance Report

Procedure Follow the steps in the procedure below to **view** the **At a glance Reports** screen.

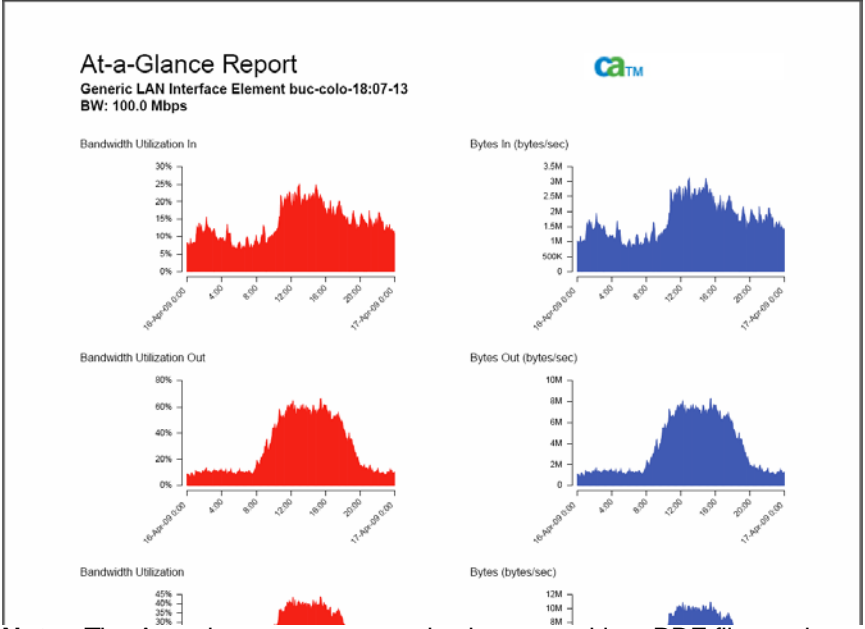

Step	Action
1	<p>From the Hosting application, click on the Reports menu.</p> <p>Result: The At a glance Reports screen appears.</p> 
2	<p>From the Date Created column, click on the corresponding report hyperlink to view the details.</p> <p>Result: The DH At a glance Report Details screen appears.</p> 

Continued on next page

Viewing the At a glance Report, continued

Procedure

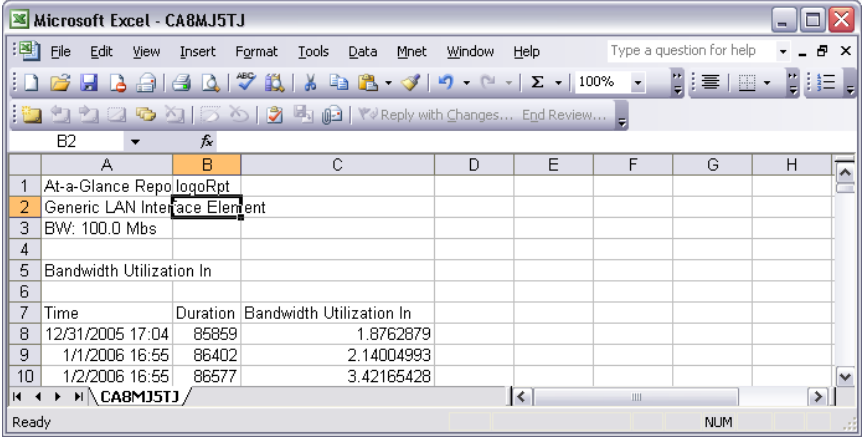

(continued)

Step	Action
3	<p>To view the report in a PDF file version, click on the corresponding “View PDF” button from the At a glance Reports screen.</p> <p>Result: The DH At a glance report opens in Adobe Reader:</p>  <p>Note: The At a glance report may also be opened in a PDF file version from the DH At a glance Report Details screen by clicking on the View PDF (VIEW PDF) hyperlink.</p>

Downloading the At a glance Report

Procedure

Follow the steps in the procedure below to **download** your **At a glance Report** to a **CSV** (Comma Separated Value) file.

Step	Action
1	<p>From the DH At a glance Report Details screen, click on the Download hyperlink to export your data to a CSV file.</p> <p>Result: The data file opens in a new window.</p> 

Sorting the At a glance Reports

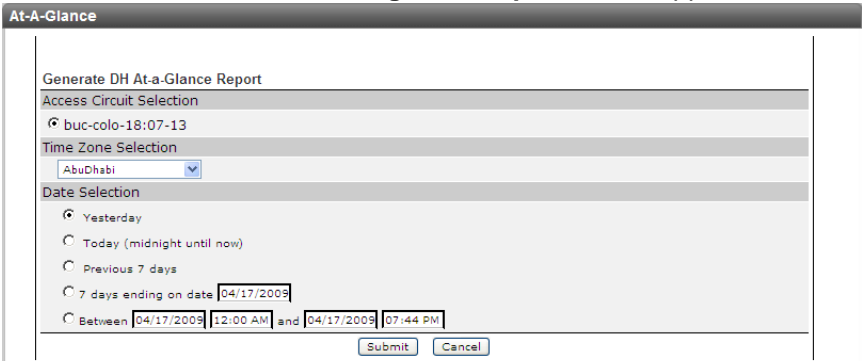

Procedure

Follow the steps in the procedure below to **sort** the **At a glance Reports** list.

Step	Action
1	From the At a glance Reports screen, click on the Date Created column label to sort the list by the date and time each listed report was generated.
2	From the At a glance Reports screen, click on the Access Circuit column label to sort the list by the circuit name.
3	From the At a glance Reports screen, click on the Report End Date column label to sort the list by the last date each listed report covers.

Generating an At a glance Report

Procedure Follow the steps in the procedure below to **generate** an **At a glance** report.

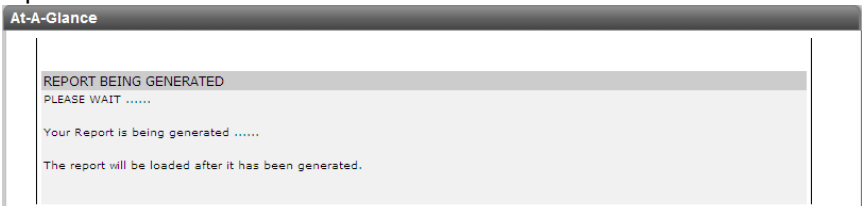

Step	Action
1	<p>From the Hosting application, select At a glance from the Reports menu.</p> <p>Result: The At a glance Reports screen appears.</p> 
2	<p>From the Functions section, click on the Generate Report link.</p> <p>Result: The Generate DH At a glance Report screen appears.</p> 
3	<p>From the Access Circuit Selection radio buttons, select the Access Circuit for your report.</p>
4	<p>From the Time Zone Selection drop-down menu, select the Time Zone in which the service component resides.</p>

Trend Reports

Introduction

The **DH Trend Reports** screen provides you a listing of the Trend reports that have been created for your Control Center Enterprise ID within the last 14 days. This screen is divided into two sections: Functions and Reports list.

- The **Functions** section of the screen allows you to generate a **Trend** report.
- The **Reports** list displays an overview of the reports available.

Note: Trend reports may be generated using a combination of either one access circuit and up to ten variables or up to ten access circuits and one variable.

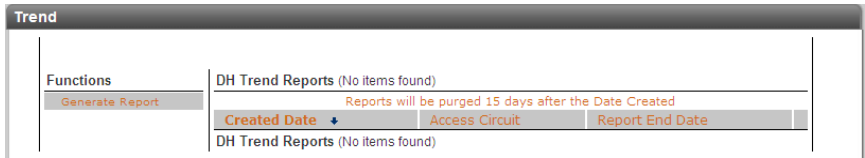

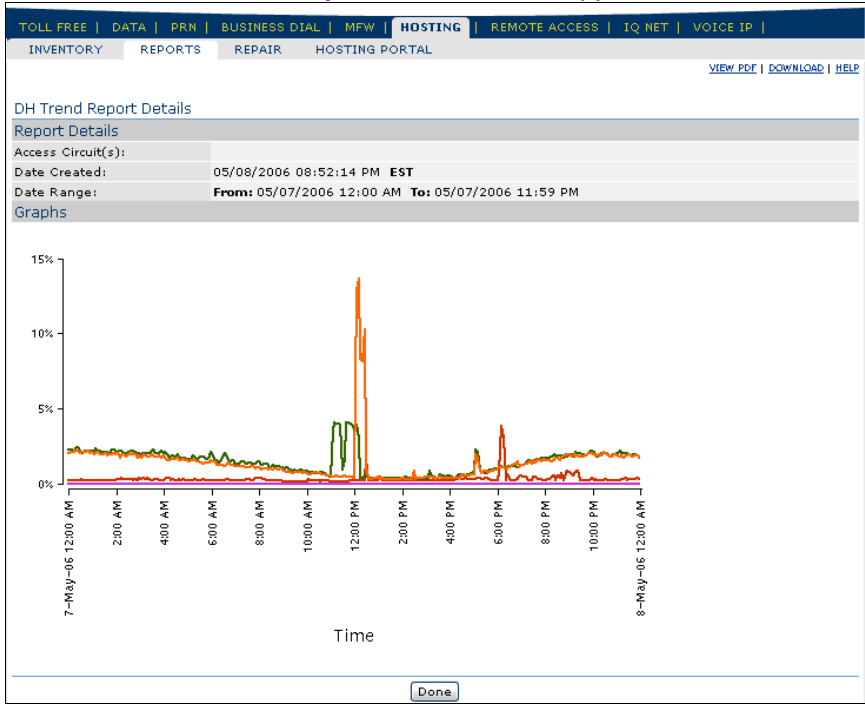

Fields and Descriptions

The table below describes the fields and buttons displayed on the **Trend** report.

Field Name	Description
Functions Section	
Generate Report	This link allows you to generate a Trend report.
Reports List Section	
Created Date	This column displays the date and time each listed report was generated.
Access Circuit	This column displays the Access Circuit on which the report was based.
Report End Date	This column displays the last date each listed report covers.
	<p>This button allows you to view the selected report in a PDF (Portable Document Format) file version.</p> <p>Note: You will need at least the Adobe Acrobat Reader in order to open the PDF file.</p>
Report Details Section	
Access Circuit(s)	This field displays the Access Circuit on which the report was based.
Date Created	This field displays the date and time the report was generated.
Date Range	This field displays the from date and time and the to date and time range the report covers
Report Graphs Section	
Graph	This graph displays the trend variables you selected in the graphical presentation you selected.
	This button allows you to return to the previous screen viewed.

Viewing the Trend Report

Procedure Follow the steps in the procedure below to **view** the **Trend Reports** screen.

Step	Action
1	<p>From the Hosting application, click on the Trend option from the Reports menu.</p> <p>Result: The Trend Reports screen appears.</p> 
2	<p>From the Date Created column, click on the corresponding report hyperlink to view the details.</p> <p>Result: The DH Trend Report Details screen appears.</p>

Billing Reports

Introduction

The **DH Burstable Billing Reports** screen provides you a graph of the samples collected at different points during the billing cycle and offers a "view text" option to show the exact values of the samples. A line on the graph represents the 95th percentile.

Fields and Descriptions

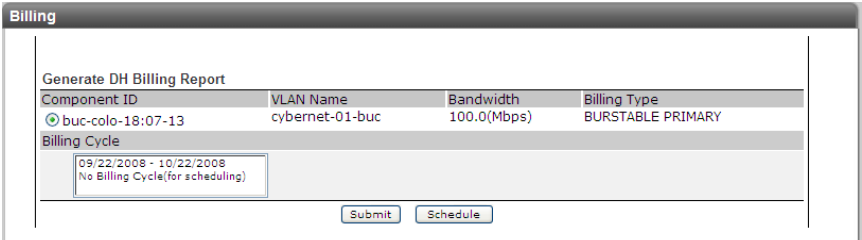

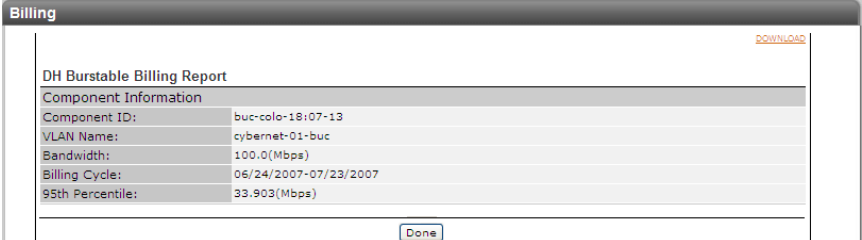

The table below describes the fields and buttons displayed on the **Billing** report.

Field Name	Description
Reports List Section	
Component ID	This column displays the unique identifier for each of your Access Circuits. Note: The Billing Cycle list changes to display the available cycles for each selected component.
VLAN Name	This column displays the VLAN Name associated with each component.
Bandwidth	This column displays the capacity and speed for each listed component. Note: The bandwidth is measured in kilobits per second (one kilobit = 1000 bits).
Billing Cycle	This field displays the billing cycle for the selected component.
95th Percentile	This field displays the 95th percentile point on which your burstable billing is based.
Graph	This graph provides a visual representation of the usage based billing data.
	This button allows you to return to the previous screen viewed.

Generating a Billing Report

Procedure

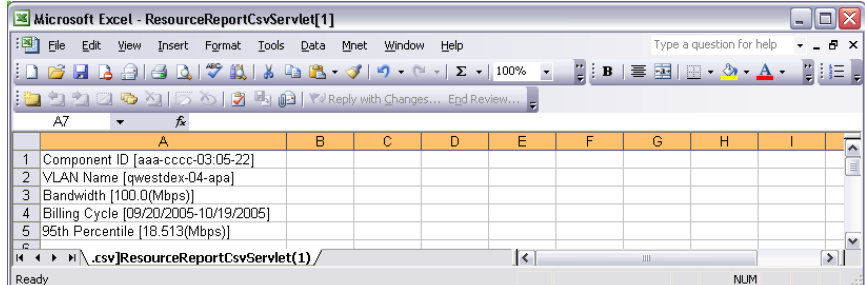

Follow the steps in the procedure below to **generate** a **Billing** report.

Step	Action
1	<p>From the Hosting application, select Billing from the Reports menu.</p> <p>Result: The Generate DH Billing Report screen appears.</p> 
2	<p>From the Component ID column, select the radio button for the desired Access Circuit.</p> <p>Result: The Billing Cycle list box changes to reflect the available cycles for the selected access circuit.</p>
3	<p>From the Billing Cycle list box, select the cycle for which you want to see billing data.</p>
4	<p>Click  (if applicable) to withdraw your requested changes and return to the previous screen.</p>
5	<p>Click  to generate your requested report.</p> <p>Result: The system retrieves the selected billing data and displays it in the DH Burstable Billing Reports screen.</p> 

Downloading the Billing Report

Procedure

Follow the steps in the procedure below to **download** your **Billing Report** to a **CSV** (Comma Separated Value) file.

Step	Action
1	<p>From the DH Burstable Billing Report Details screen, click on the Download hyperlink to export your data to a CSV file.</p> <p>Result: The data file opens in a new window.</p> 

Hosting Repair

Introduction

The **Repair** menu provides you the ability to view and create repair tickets for your **Hosting** services. This functionality can be accessed via the **Hosting** product application or the **Repair** Module.

For detailed instructions, see **Chapter 11: Repair Module**.

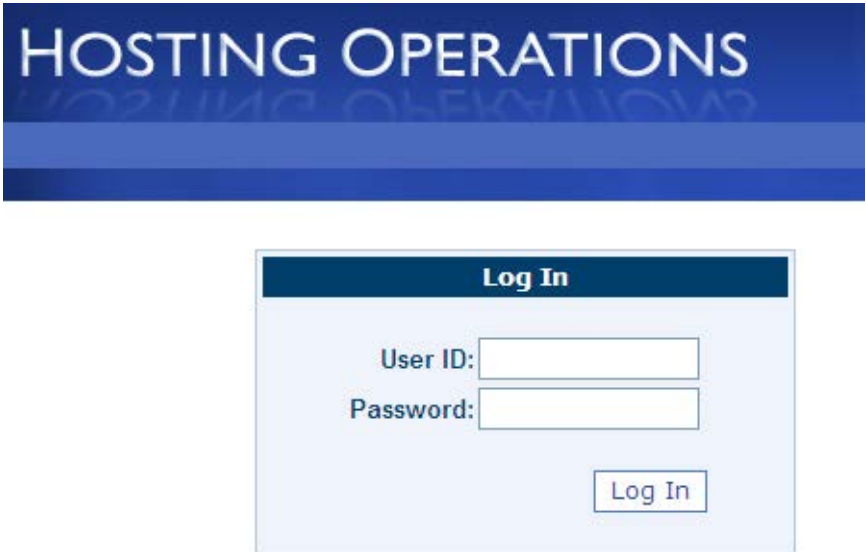

Hosting Portal

Introduction The **Hosting Portal** screen allows you to access your account information.

Note: You must have a separate login to access the Hosting Portal.

Accessing the Hosting Portal

Procedure Follow the steps in the procedure below to **access** the **Hosting Portal**.

Step	Action
	<p>From the Hosting application, click on the Hosting Portal menu.</p> <p>Result: A Pop up screen will appear. Click </p> <p>Result: The Hosting Operations Performance Monitoring portal appears.</p> 
2	In the User Name field, enter your username.
3	In the Password field, enter you corresponding password.

4

Click .

Result: The **Customer View Selection** screen appears.
